The City of York Council

Petition for Permit Parking Scheme request In Malton and Irwin Avenue, Heworth, York.

Over a long period of time Malton and Irwin Avenue has become what seems like York's latest long stay car park. Cars arrive in the area from very early morning and leave late at night after parking all day without moving. The ongoing non-resident parking causes many problems for the residents who actually live in the area.

Unable to have visitors parking, grass verges destroyed, cars parked up to and on the corners of the road making it very dangerous and in some cases impossible for people to actually get in and out of their own driveways. Cars parked all day while the owners walk to work. We the residents do not see parking in the area improving anytime soon only getting worse in the future.

For the reasons stated, we the attached signatures, ask that City of York Council consider making make Malton /Irwin Avenue a resident permit parking area as per the new road traffic regulations set out from January 2012.

We would require a consultation with CYC on the times the parking restrictions should be in force. As the new regulations state they give more control to the residents and we would need a majority opinion on parking times.

Thank you on behalf of the residents of Malton and Irwin Avenue

Regards

Paul Holmes and John Fletcher
