

Annex B: Policy H7: Residential Extensions

Planning permission will be granted for residential extensions where:

- a) the design and materials are sympathetic to the main dwelling and the locality of the development; and
- b) the design and scale are appropriate in relation the main building; and
- d) there is no adverse effect on the amenity which neighbouring residents could reasonably expect to enjoy; and
- e) proposals respect the spaces between dwellings; and
- g) the proposed extension does not result in an unacceptable reduction in private amenity space within the curtilage of the dwelling.

7.49 Residential extensions are generally acceptable provided they are sympathetically designed in relation to their host building and the character of the area in which they are located and do not detract from the residential amenity of existing neighbours. Particular care is needed, however, in the design of front extensions and dormer extensions. Pitched roofs on extensions will normally be the most appropriate with large, box-style roof extensions being resisted in most cases.
