

**Notice of a public**

**Decision Session - Executive Member for Housing and Safer Neighbourhoods**

**To:** Councillor Craghill (Executive Member)

**Date:** Thursday, 20 October 2022

**Time:** 10.00 am

**Venue:** The Thornton Room - Ground Floor, West Offices (G039)

**AGENDA**

**Notice to Members – Post Decision Calling In:**

Members are reminded that, should they wish to call in any item\* on this agenda, notice must be given to Democratic Services by **4:00pm** on **24 October 2022**.

\*With the exception of matters that have been the subject of a previous call in, require Full Council approval or are urgent which are not subject to the call-in provisions. Any called in items will be considered by the Customer and Corporate Services Scrutiny Management Committee.

**Written representations in respect of items on this agenda should be submitted to Democratic Services by 5.00pm on Tuesday 18 October 2022.**

**1. Declarations of Interest**

At this point in the meeting, the Executive Member is asked to declare any disclosable pecuniary interests or other registerable interests she might have in respect of business on this agenda, if she has not already done so in advance on the Register of Interests.

**2. Minutes**

(Pages 1 - 4)

To approve and sign the minutes of the meeting held on 14 July 2022.

### **3. Public Participation**

At this point in the meeting members of the public who have registered to speak can do so. Members of the public may speak on agenda items or on matters within the remit of the committee.

Please note that our registration deadlines are set as 2 working days before the meeting, in order to facilitate the management of public participation at our meetings. The deadline for registering at this meeting is **5:00pm on Tuesday 18 October 2022**.

To register to speak please visit [www.york.gov.uk/AttendCouncilMeetings](http://www.york.gov.uk/AttendCouncilMeetings) to fill in an online registration form. If you have any questions about the registration form or the meeting, please contact Democratic Services. Contact details can be found at the foot of this agenda.

### **Webcasting of Public Meetings**

Please note that, subject to available resources, this meeting will be webcast including any registered public speakers who have given their permission. The meeting can be viewed live and on demand at <http://www.york.gov.uk/webcasts>.

During coronavirus, we made some changes to how we ran council meetings, including facilitating remote participation by public speakers. See our updates (<http://www.york.gov.uk/COVIDDemocracy>) for more information on meetings and decisions.

### **4. Retrofit Programme - Housing Revenue Account (HRA) Strategy Update** (Pages 5 - 18)

This report provides a progress on delivering retrofit works following the success of attracting grant funding to support cross tenure improvement works and asks the Executive Member to decide the basis of the bid under Social Housing Decarbonisation Fund Wave 2 and to decide whether to undertake a programme of rapid energy improvement works utilising existing budgets.

### **5. Urgent Business**

Any other business which the Executive Member considers urgent under the Local Government Act 1972.

Democracy Officer:

Louise Cook

Contact details:

- Telephone – (01904) 551031
- Email [louise.cook@york.gov.uk](mailto:louise.cook@york.gov.uk)

For more information about any of the following please contact the Democracy Officer responsible for servicing this meeting:

- Registering to speak
- Business of the meeting
- Any special arrangements
- Copies of reports and
- For receiving reports in other formats

Contact details are set out above.

City of York Council

Committee Minutes

---

Meeting	Decision Session - Executive Member for Housing and Safer Neighbourhoods
Date	14 July 2022
Present	Councillor Craghill (Executive Member)
In attendance	Michael Jones (Head of Housing Delivery and Asset Management) Andrew Bebbington (Housing Policy Officer)

---

### 1. **Declarations of Interest (10:01)**

The Executive Member was asked to declare at this point in the meeting any disclosable pecuniary interests or other registerable interests that she might have in the business on the agenda, if she had not already done so in advance on the Register of Interests. None were declared.

### 2. **Minutes (10:02)**

Resolved: That the minutes of the previous meeting held on 19 May 2022 be approved and signed as a correct record by the Executive Member subject to point 22, second paragraph, second bullet point, being amended to:

- 82% of respondents confirmed they had experienced anti-social behaviour (ASB) in the Union Terrace *Car Park* and Clarence Street *area*, 90% agreed to *controls* on drinking alcohol *outdoors* and 92% were in favour of removing large groups of 3 or more people who were causing anti-social behaviour.

### 3. **Public Participation (10:03)**

It was reported that there had been no registrations to speak at the meeting under the Council's Public Participation Scheme.

#### **4. Retrofit Programme - Housing Revenue Account (HRA) Strategy Update (10:03)**

The Executive Member considered a report that provided an update on the progress on the Retrofit Action Plan and associated workstreams.

The Head of Housing Delivery and Asset Management provided an update on the retrofit works, outlining progress since the last update, including a timetable for future work to deliver the Retrofit Action Plan and the funding streams available.

The Executive Member noted that:

- Social Housing Decarbonisation Fund Wave 1 (SHDF W1) and Local Authority Delivery 2 (LAD2) funding had been secured and was being used to improve a number of council homes through the installation of solar photovoltaics (PV) panels, alongside a number of other measures in private rented and home ownership tenures through LAD2.
- The Social Housing Decarbonisation Fund (SHDF) was currently being utilised to deliver fabric improvements to 28 council homes.
- Stock modelling information, funded through LAD grant funding, had been received and it provided detailed analysis of our housing stock, including identifying opportunities for improvements. Utilising this information would identify opportunities for carbon reduction and produce some quick wins to hopefully help reduce residents' energy bills this winter.
- Home building performance monitoring technology provided valuable input into understanding data around temperature, humidity and ventilation. This knowledge would help to identify both opportunities for more efficient user choices as well as fabric home improvement opportunities.
- The cost of retrofit works to deliver improvements across our council housing stock would be significant. One opportunity to meet this challenge included a "shared benefits charge" in future Housing Revenue Account retrofit investment programmes.
- The Retrofit Action Plan set out plans for decarbonising homes in York and tackling fuel poverty across all tenures. It was important that the action plan was considered by Scrutiny and Executive to create a well-defined strategic

approach to activities over the coming years. It was highly likely that the action plan would remain a live document, to respond to changes in technology, costs, and funding opportunities.

The Executive Member welcomed the report and annexes, noting the funding opportunities and the complexity to developing a Retrofit Action Plan across all tenures, particularly during a time of great change, in terms of the current cost of living crisis and the rise in energy bills. She stated that improvements to the energy efficiency of homes in the city would not only improve the comfort and the health of our homes but could significantly reduce energy bills and the overall demand for energy, which was crucial for our energy security, as well as reducing climate emissions at a local level.

The Executive Member also welcomed the work that was underway to explore quick energy efficiency wins that could be implemented this year to help council tenants to deal with rising energy bills. She agreed that the focus on our council housing stock could also work as a key driver for developing local skills in local building companies, as well as up skilling our own building services staff.

The Executive Member thanked officers for their report, and it was

Resolved:

- i) That the progress to date be noted on delivering retrofit works within council homes alongside the development of further analysis and options to deliver further improvements this year and beyond.

Reason: To deliver the council's ambitions for minimising tenants' energy bills, building the local green economy and retrofit supply chains, and reducing carbon emissions in the city.

- ii) That the ongoing preparation for a Social Housing Decarbonisation Wave 2 bid be noted following the council's successful application for Wave 1 funding and that a business case for this investment will be brought forward later this year.

Reason: Grant funding of up to 50% of total costs can substantially increase the pace of retrofit improvements carried out in Housing Revenue Account (HRA) stock.

- iii) That the intention to submit a bid through the anticipated Social Housing Decarbonisation Fund “digitalisation” programme for building performance monitoring and data analytics technology be noted. This would need to be supported by HRA investment and a business case will be brought forward for approval prior to committing to this programme of works.

Reason: This technology can support better informed forecasting of residents’ energy bill savings following retrofit works. This will enable leverage of financial opportunities and facilitate learning opportunities as well as supporting the most effective investment in improvement works.

- iv) That the intention to continue work towards HRA stock decarbonisation within the Retrofit Action Plan, including commissioning of an evidence base to support this, be noted.

Reason: To identify long-term investment priorities and build on the existing stock analysis, and to provide net zero pathway options.

Cllr Craghill, Executive Member

[The meeting started at 10.00 am and finished at 10.15 am].

---

**Decision Session – Executive Member for  
Housing and Safer Neighbourhoods****20 October 2022**

Report of the Director of Housing, Economy and Regeneration

**Retrofit programme – Housing Revenue Account (HRA) strategy update**

1. Since Executive approval in December 2020 to establish a Home Energy Efficiency Programme, the council has delivered retrofit programmes on a significant scale across all tenures. This financial year we expect to deliver over 500 improvement measures to around 250 homes across all tenures. The majority of these works are wholly or predominantly funded utilising government funding which we successfully secured in 2021/22. These retrofit works are delivered to a high standard under the exacting PAS2035 quality framework, adding complexity and robustness to the improvement works.
2. The retrofit challenge is significant and we need to continue to accelerate retrofit works into next year. To support this a grant application of over £1m is being prepared under the Social Housing Decarbonisation Fund Wave 2 programme. This grant would be match funded by the Housing Revenue Account (HRA), therefore delivering over £2m of retrofit work to council houses over a two-year period. This investment would significantly improve the energy performance of 113 council homes to at least an EPC C standard.
3. The match funding proposal would fully commit the £2m HRA Retrofit Fund and details of all spend items are set out in this paper. Should the bid be successful, around 190 council homes would have been improved to at least an EPC C standard utilising this existing budget. The drafted Retrofit Action Plan is currently out to formal public consultation and sets out the need and range of tools available to both deliver and facilitate further retrofit works over the coming years. The Retrofit Action Plan aims to reduce emissions and energy bills across all tenures and will be considered by Executive later this year.
4. To date, HRA capital funding has been utilised alongside grant funding to deliver significant retrofit works on 'difficult to treat' properties. This will

bring long term benefits to residents and improves the quality of our housing stock for future generations. In the last year, the country has experienced a significant cost of living challenge, this will be felt most acutely by low-income households in the city. The recent significant rise in fuel costs will make it more difficult for residents to keep their homes warm this winter. As a direct response to this, it is proposed that the council undertake a series of 'quick win' interventions over the coming six months to help residents stay warm. As such it is proposed that £60k is allocated to allow measures such as draught proofing and simple insulation measures be carried out to the homes of around 250 of our most vulnerable council tenants.

## Recommendations

5. The Executive Member is asked to:

- i) Note the progress on delivering retrofit works following the success of attracting grant funding to support cross tenure improvement works.
- ii) Approve the allocation of £1.015m from the existing HRA retrofit budget to match fund government grant under the Social Housing Decarbonisation Wave 2 Fund. Note the proposed details of the submission of a grant bid of around £1m, therefore enabling a £2m retrofit project.
- iii) Note the full expenditure allocation for the £2m HRA Retrofit Fund approved by Executive in 2019/20, and the associated improvement of 190 low performing council homes to at least EPC C standard once this funding programme is complete.
- iv) Approve the allocation of £60k from the existing retrofit budget to deliver around 250 'quick win' retrofit works this winter to support some of our most vulnerable residents this winter.

Reason: To deliver the council's ambitions for minimising tenants' energy bills and supporting health and wellbeing, building the local green economy and retrofit supply chains, and reducing carbon emissions in the city.

## Background

6. Household energy bills have increased substantially in the last year, with a typical bill likely to have doubled from 2021 to October 2022. This is taking into account the central government Energy Price Guarantee

announcement, or the increases would have been greater still<sup>1</sup>. These costs will significantly raise the number of households experiencing fuel poverty. Alongside the challenge for residents to keep their homes warm, the council has set an ambition for the city to be carbon neutral by 2030 to support the response to the climate emergency. These two challenges bring into sharp focus the need to undertake significant retrofit improvements to the council's housing stock.

7. A Retrofit Action Plan is currently undergoing public consultation, setting out plans for decarbonising homes in York and tackling fuel poverty across all tenures. This Retrofit Action Plan will be considered by Executive later this year and will build on the Climate Change Strategy, identifying clear actions required in the residential sector to meet these aspirations.
8. The council has been highly successful in attracting grant funding in order to accelerate retrofit works across private rented, homeowner and social housing tenures. This work has directly supported residents in fuel poverty by significantly improving the energy performance of their home.

### **Progress in delivering Retrofit works**

9. Retrofit grant funding requires works to be undertaken utilising an exacting PAS2035 design and assurance standard. These works are delivered by a relatively immature retrofit supply chain at a time of significant cost inflation. Alongside the supply chain skills shortage, the council has needed to develop expertise in this field in order to support the delivery of these works. This has created significant challenges in delivering retrofit works at scale within the very short timescales which are associated with these government grant funding programmes.
10. Despite these challenges the council has made significant progress in delivering retrofit works to date. In respect of works to council homes, Local Authority Delivery 2 (LAD2) and Social Housing Decarbonisation Fund Wave 1 (SHDF W1) grant funding has been secured. Utilising LAD2 funding, 45 council homes have been improved through the installation of solar PV. Top up loft insulation to 300mm was also provided for all properties where needed. These works have reduced residents' fuel bills, improved the thermal performance of the homes, and reduced carbon emissions, taking these 45 homes from an Energy Performance Certificate (EPC) D rating, to a C rating or higher.

---

<sup>1</sup> <https://www.gov.uk/government/news/government-announces-energy-price-guarantee-for-families-and-businesses-while-urgently-taking-action-to-reform-broken-energy-market>

11. SHDF W1 has been secured to deliver fabric improvements to 28 council homes at Danebury Court and Harington Avenue, with further opportunities identified for an additional 4 properties to be brought into the programme through HRA funding. A contractor has been procured to undertake these works which are due to take place this financial year. These works will comply with the high standards outlined in PAS2035 which requires detailed design work to ensure the measures are effective with consideration of the long-term condition of the building fabric. These works will improve the thermal performance of the homes, reduce heating demand, save residents money on fuel costs, and improve the comfort of the homes. Again, these works will increase the EPC rating of all homes to at least a C.
12. In the private sector, retrofit works are being delivered utilising grant funding secured through LAD1B, LAD2, LAD3, and Home Upgrade Grant 1 (HUG1). To date, 183 improvement measures have been installed for homes in the private sector. Measures include room in roof insulation, cavity wall insulation, and Solar PV and Air Source Heat Pump installation. All of these works have been entirely funded utilising central government grant to qualifying low-income households.
13. The table below summarises works completed to date:

<b>Measure</b>	<b>Number of measures</b>
<b>Private Homes</b>	
Cavity Wall Insulation	39
Loft insulation	80
Room in Roof insulation	23
Solar PV Installation	26
Air Source Heat Pump Installation	1
<b>Council Homes and other social housing</b>	
Solar PV and loft insulation (council homes)	45
Air Source Heat Pumps (JRHT)	6
Social PV (Yorkshire Housing)	8
<b>Total retrofit measures installed</b>	<b>228</b>

14. Works under the LAD1 and 2 programmes were required to be completed by September this year, and therefore no further works can be undertaken under these funding programmes.

15. A further 362 retrofit works are planned utilising grant funding secured under LAD3, HUG1 and SHDF W1. These works are summarised below:

Measures	LAD3	HUG1	SHDF
External Wall Insulation	25	0	28
Underfloor Insulation	22	0	28
Loft (top-up) Insulation	125	6	0
Solar PV	80	20	0
Hybrid Air Source Heat Pump	15	0	0
Full System Air Source Heat Pump	0	13	0

16. Once complete, this will bring the number of retrofit works delivered to 590.

### **Social Housing Decarbonisation Fund Wave 2 bid proposal**

17. A new bid round of the SHDF (Wave 2: SHDF W2) has been announced by the Business, Energy and Industrial Strategy Department (BEIS) on 29 September 2022, open to submissions until 18 November 2022<sup>2</sup>. This presents the opportunity to accelerate our ambitions to deliver significant retrofit works to our own council housing stock.
18. The delivery window is longer than previous funding rounds, allowing delivery over two years, from April 2023 to March 2025. Bids must include a minimum of 100 properties.
19. Properties will be expected to be at EPC D or below, with potentially only 10% infill at EPC C eligible for inclusion, and a continued focus on “fabric first” improvements with PAS2035 standards built into the programme.
20. Successful providers will be required to fund a minimum of 50% of project costs. BEIS has set out funding limits of £5,000 per cavity wall property and £10,000 per solid wall property, for EPC D homes. This gives a typical project cost of £10,000 and £20,000 per property,

<sup>2</sup> <https://www.gov.uk/government/publications/social-housing-decarbonisation-fund-wave-2>

including the council's contribution. Properties with partial non-cavity walls are eligible as solid wall homes in recognition of the cost and complexity of insulation.

21. Using the recently received Parity Projects Portfolio software data alongside our EPC records, we now have a more comprehensive understanding of the types of measures needed to improve our stock. This has provided the basis for an SHDF Wave 2 bid.
22. We have created a draft bid proposal which balances local priorities, the complex SHDF Wave 2 eligibility and funding criteria and delivery risk mitigation where possible. £1.0075m grant funding is sought, with a similar amount to be allocated from the existing £2m HRA retrofit budget. The proposed measures are summarised in the table below:

Property type	Likely number	Likely Measures	SHDF W2 grant funding	HRA match funding
<b>Bell Farm Pods</b>	40	Uninsulated 'pod' replacement  Mix of underfloor insulation, potentially some external wall insulation, potential hybrid heat pump and / or solar PV	£340,000	£340,000
<b>Bungalows</b>	48	Partial external wall insulation, fabric improvements, PV, + potentially battery / hybrid heat pump in a minority of properties to monitor / trial	£480,000	£480,000
<b>Standing water solid wall ginnel properties</b>	10	Likely external wall insulation to solid wall section, other fabric improvements, plus potential PV / battery / hybrid heat pump	£75,000	£75,000
<b>Solid wall ginnel properties – other routes e.g. void</b>	15	Likely external wall insulation to solid wall section, other fabric improvements, plus potential PV / battery / hybrid heat pump	£112,500	£112,500
<b>Total</b>	<b>113</b>		<b>£1,007,500</b>	<b>£1,007,500</b>

23. The key reasons why these properties have been selected are:

- Alignment with other HRA capital programmes - around 75 of the homes are due to receive significant works in the next two years (for example new kitchens and bathrooms), undertaking retrofit works at the same time will drive efficiencies and reduce tenant disruption
- Taking account of risks of delivery and costs by applying learnings from existing PAS2035 projects
- The projects can build relationships with high quality supply chain partners over the long-term

- Utilisation of a range of low carbon technologies that will provide significant learnings, supporting the efficient scaling up of the programme
- Opportunities for pre- and post-works monitoring and for data-led analysis
- Properties of an identified priority type for retrofit improvements and found in significant numbers across the HRA stock

24. There may be some further amendment to this proposal, as the bid process involves a 'co-production' mechanism whereby a consultancy acting on behalf of BEIS reviews plans and provides critical feedback, which is underway. Therefore the measures outlined should be treated as a guide until the formal bid is finalised. The number of properties due to receive works will not alter significantly.

### **Quick Wins Proposal**

25. The retrofit measures outlined in this report are complex and resource intensive to deliver. Whilst we deliver these projects, finalise the Retrofit Action Plan, and work towards scaling up our delivery opportunities utilising further grant funding, it is proposed that we look to support some of our most vulnerable tenants in the short term through a series of quick win interventions. It is proposed that £60,000 be allocated from the existing HRA retrofit budget to deliver improvements to around 250 tenants this winter. These works will not require a high level of specialist knowledge and much of the work will be rolled out from a single visit by a handyman. High cost-effectiveness measures such as draught proofing, installation of efficient LED lightbulbs and external wall radiator insulation will be delivered to up to 250 tenants who are identified as vulnerable and/or living in Band D rated council homes.

### **Summary of Financial Investments**

26. The table below sets out the full spend profile for the £2m Retrofit budget which was approved by Executive in December 2020. This assumes a successful grant application under SHDF W2. Should this application be unsuccessful, a further business case will be developed to support the allocation of these funds to retrofit works.

<b>Costs to CYC</b> <b>Note: this is not full project cost, which includes grant funding</b>	<b>HRA Retrofit Fund Spend / Commitment</b>	<b>Homes improved to EPC C standard*</b>
LAD2 Solar PV, loft insulation and roof works	£283,220	45
SHDF Wave 1 fabric improvements to priority homes	£350,178	32
CYC project delivery staffing resource over 2 years	£96,430	n/a
HRA “quick wins” rapid intervention improvements	£60,000	n/a
Property energy performance monitoring	£15,000	n/a
Housing stock energy modelling	£7,500	n/a
SHDF Wave 2 bid proposal – match funding plus £10k surveys	£1,017,500	113
SHDF Wave 2 bid proposal 5% contingency	£110,172	n/a
SHDF Wave 2 digitalisation	£20,000	n/a
HRA stock net zero pathway commissioned study	£15,000	n/a
Alex Lyon House low carbon heating feasibility	£25,000	n/a
<b>Total</b>	<b>£2,000,000</b>	<b>190</b>

### Timetable for retrofit programmes discussed in this report

<b>Date</b>	<b>Action</b>	<b>Notes / progress</b>
30 September 2022	LAD1B and LAD2 programme delivery final date	Complete
October 2022	20 <sup>th</sup> October: EMDS paper	
October-January 2022	Procurement exercise to identify programme delivery partner	Underway

Date	Action	Notes / progress
November 18 <sup>th</sup> 2022	SHDF W2 bid window closes for bids	Confirmed
December 2022	Executive consideration of Retrofit Action Plan	Draft out for consultation
February 2023	Outcome of SHDF W2 bid announced	
March 2023	SHDF Wave 1 and LAD3 delivery completion, “quick wins” 2022/23 phase completion	
April 2023	SHDF Wave 2 delivery to commence if successful Revised HRA Retrofit Programme to commence if bid unsuccessful	
March 2025	SHDF Wave 2 delivery completion	

## Consultation

27. Consultation has been undertaken with external stakeholders, Council Members and officers at various stages during 2021-22 on key priorities identified within the draft Retrofit Action Plan, which informs the recommendations of this report.

## Council Plan

28. Retrofit delivery and an action plan aligns with a number of key objectives within the Council Plan:

**Well-paid jobs and an inclusive economy** – Retrofit of existing homes requires a skilled workforce and is labour intensive by the nature of the work involved. People working in the construction industry are typically paid above the national average. Utilising central government grant funding alongside HRA capital to deliver works creates

opportunities for work with the supply chain to create opportunities for further training and skills development locally.

**A greener and cleaner city** – Our housing stock is a major source of carbon emissions. Retrofit improves the thermal performance of existing dwellings, reduces heating demand and thus reduces the amount of gas/electricity required to heat a dwelling.

**Good health and wellbeing** – Exposure of residents to excess cold exacerbates a range of health conditions and contributes to increased hospital admissions during the winter months. The elderly are particularly at risk from excess cold. Retrofitting homes will make tangible improvements to the energy performance of dwellings thereby reducing incidents of excess cold and associated ill health.

29. **Implications** – Responses from colleagues for relevant aspects will be included below.

- **Financial** – The HRA has an agreed budget of £2m for energy efficiency measures across the council dwelling stock. This funding is being maximised with match funding from several Government initiatives, with £0.63m of CYC budget being committed for the LAD2 & SHDF Wave1 scheme, leaving £1.37m for the SHDF Wave 2 and the other initiatives outlined above.
- **Human Resources (HR)** – There are no HR implications to this report.
- **Equalities** – The Council is mindful of the Public Sector Equality Duty under Section 149 of the Equality Act 2010 (to have due regard to the need to eliminate discrimination, harassment, victimisation and any other prohibited conduct; advance equality of opportunity between persons who share a relevant protected characteristic and persons who do not share it and foster good relations between persons who share a relevant protected characteristic and persons who do not share it in the exercise of a public authority's functions). An equalities impact assessment was completed when this programme was launched and approved by Executive in December 2020. There is no adverse impact expected in terms of equalities.
- **Legal** – Legal Services will carry out a review of any proposed grant funding agreement and in respect of the UK Subsidy Control Rules (previously State aid) to confirm whether any mitigating actions need

to be taken prior to entering into the funding agreement. Legal Services have provided advice to the Housing Energy Efficiency team throughout the project.

- **Crime and Disorder** – There are no Crime and Disorder implications.
- **Information Technology (IT)** – There are no IT implications.
- **Property** – There are no Property implications.

## **Risk Management**

30. Retrofit works are complex. They require careful design and implementation in order to ensure home improvements in the long term. Detailed engagement is taking place at all stages of the development of the Retrofit Action Plan which informs these programmes alongside consideration of emerging good practice and the experience of other authorities. We have procured and received further data analysis of our council homes to ensure we are able to make more informed decisions regarding suitable works and likely costs. All risks are monitored through project risk registers for each programme of works with governance in place to ensure these risks are continually reviewed and appropriate decisions are made in response.
