MEETING	LOCAL DEVELOPMENT FRAMEWORK WORKING GROUP
DATE	6 MARCH 2007
PRESENT	COUNCILLORS REID (CHAIR), D'AGORNE, HORTON, HYMAN, MACDONALD, MERRETT, SIMPSON-LAING, WALLER AND MORLEY (SUBSTITUTE)
APOLOGIES	COUNCILLORS R WATSON

---

### 33. DECLARATIONS OF INTEREST

Members were invited to declare at this point in the meeting any personal or prejudicial interests they might have in the business on the agenda.

No interests were declared.

### 34. MINUTES

RESOLVED: That the minutes of the Local Development Framework Working Group meeting held on 1 February 2007 be approved and signed by the Chair as a correct record.

### 35. PUBLIC PARTICIPATION

It was reported that there had been no registrations to speak at the meeting under the Council's Public Participation Scheme.

### 36. CITY OF YORK HOUSING LAND AVAILABILITY ASSESSMENT - CONSULTATION ON PROPOSED METHODOLOGY

Members received a report which sought their views on the proposed methodology for the City of York Housing Land Availability Assessment (HLAA) prior to undertaking the study.

The draft Planning Policy Statement 3 (PPS3) set out the following key stages to the HLAA methodology:

- Establishing the process with partners;
- Identifying all the settlements where housing could be provided;
- Considering all potential sources of supply for new housing within these settlements;
- Quantifying the supply – i.e. how many houses can these sources of supply potentially deliver;
- Determining the likely level of windfall; and
- Considering 'developability'.

The draft methodology, attached at Annex A of the report, set out the proposed approach to each of these stages.

Members requested that the methodology be amended to reflect their comments and views and that the amended version be re-presented for their consideration.

RECOMMENDED:

- (i) That the following comments and views on the proposed methodology for the Housing Land Availability Assessment be agreed:
  - Some constraints to be applied initially to potential sites to reduce the number that would be withdrawn at the next stage
  - Conversion may be possible to listed buildings and within conservation areas so these should not be primary constraints
  - Highways capacity should be a secondary constraint
  - Access to frequent public transport measurements should be amended to that used in CYC planning policy
  - Local Service Centres should be based on City of York Council figures rather than national figures
  - Map of character zones to be corrected
  - More specific zoning for City Centre
  - The inclusion of larger villages to be considered
- (ii) That the views of the Working Group be taken into account alongside those from other key stakeholders when the methodology for the Housing Land Availability Assessment is finalised.

REASON: To ensure that the methodology used to undertake the assessment is appropriate in relation to guidance and local circumstances.

**37. CITY OF YORK LOCAL DEVELOPMENT FRAMEWORK: PLANNING AND CLIMATE CHANGE: CITY OF YORK'S POTENTIAL TO DELIVER ON SUB-REGIONAL RENEWABLE ENERGY TARGETS**

Members received a report which introduced the draft supplement to Planning Policy Statement 1 on Planning and Climate Change and informed them of the new key strategic issues which this document raised. It also advised of City of York's potential to contribute to sub-regional renewable energy targets through the planning system, in advance of consultation on these matters as part of the Local Development Framework process.

The draft supplement raised the following key strategic issues:

- That the approach to the Core Strategy and the allocation of sites should consider how decentralised energy supply could contribute. This would require Local Planning Authorities to assess the potential for their areas to

accommodate renewable and low-carbon technologies, including for micro-renewables to be secured in new residential, commercial or industrial development. In terms of allocating land for development, it was proposed that priority be given to sites which performed well against a series of criteria, including:

- ◆ the effect of development on biodiversity and the capacity for adaptation;
  - ◆ the contribution to be made from existing and new opportunities for open space to urban cooling
  - ◆ physical and environmental constraints on the development of land such as flood risk and stability, taking a precautionary approach to increases in risk that could arise as a result of likely changes to climate;
- That consideration should be given to the allocation of sites for renewable and low carbon energy sources and its supporting infrastructure;
  - That it should be ensured that a significant proportion of the energy supply of substantial new development was gained on-site and renewably and/or from a decentralised, renewable or low carbon energy supply;
  - That the Regional Spatial Strategy should be required to establish carbon emission trajectories, whereby the performance of buildings would be monitored over time, including for the likely transport energy demands of the new development and its spatial distribution.

Figure 2 of the report showed a variety of means in which York could meet its indicative renewable energy target, and the implication of each of those means. Consultation on the LDF would consider such potential approaches, and invite comment on the levels and means of providing energy from renewable sources in domestic, commercial and other settings.

**RECOMMENDED:** That the key strategic requirement of draft Planning Policy Statement 1 (PPS1), as detailed in the report, be noted and support be given for the issues raised to be considered as part of the consultation on the Local Development Framework.

**REASON:** To ensure that full consideration is given to emerging national planning guidance on climate change as part of the preparation of the Local Development Framework.

COUNCILLOR A REID

Chair

The meeting started at 5.15 pm and finished at 7.00 pm.
