

Notice of meeting of

Decision Session - Executive Member for Health & Adult Social Services

To: Councillor Morley (Executive Member)

Date: Tuesday, 27 July 2010

Time: 4.00 pm

Venue: Guildhall

AGENDA

Notice to Members – Calling In

Members are reminded that, should they wish to call in any item on this agenda, notice must be given to Democracy Support Group by:

10.00 am on Monday 26 July 2010 if an item is called in before a decision is taken, or

4.00pm on Thursday 29 July 2010 if an item is called in after a decision has been taken.

Items called in will be considered by the Scrutiny Management Committee.

Written representations in respect of items on this agenda should be submitted to Democratic Services by 5.00pm on Friday 23 July 2010.

1. Declarations of Interest

At this point Members are asked to declare any personal or prejudicial interests they may have in the business on this agenda.

2. Minutes (Pages 3 - 6)

To approve and sign the minutes of the meeting held on Tuesday 27 April 2010.

3. Public Participation - Decision Session

At this point in the meeting, members of the public who have registered their wish to speak at the meeting can do so. The deadline for registering is **5:00pm on Monday 26 July 2010.**

Members of the public may register to speak on:-

- an item on the agenda;
- an issue within the Executive Member's remit;
- an item that has been published on the Information Log since the last session. Information reports are listed at the end of the agenda.

4. A Joint Vision for Older People's Health and Well Being in York 2010-2015 (Pages 7 - 22)

This paper seeks the Executive Member's agreement to a joint vision for health and social care services in York for older people.

5. Urgent Business

Any other business which the Chair considers urgent under the Local Government Act 1972

Information Reports

No information reports have been published on the Information Log for this session.

Democracy Officers

Catherine Clarke and Louise Cook (job share)

Contact details:

- Telephone – (01904) 551031
- Email catherine.clarke@york.gov.uk and louise.cook@york.gov.uk

(If contacting by email, please send to both Democracy officers named above).

For more information about any of the following please contact the Democracy Officer responsible for servicing this meeting:

- Registering to speak
- Business of the meeting
- Any special arrangements
- Copies of reports

Contact details are set out above.

About City of York Council Meetings

Would you like to speak at this meeting?

If you would, you will need to:

- register by contacting the Democracy Officer (whose name and contact details can be found on the agenda for the meeting) **no later than 5.00 pm** on the last working day before the meeting;
- ensure that what you want to say speak relates to an item of business on the agenda or an issue which the committee has power to consider (speak to the Democracy Officer for advice on this);
- find out about the rules for public speaking from the Democracy Officer.

A leaflet on public participation is available on the Council's website or from Democratic Services by telephoning York (01904) 551088

Further information about what's being discussed at this meeting

All the reports which Members will be considering are available for viewing online on the Council's website. Alternatively, copies of individual reports or the full agenda are available from Democratic Services. Contact the Democracy Officer whose name and contact details are given on the agenda for the meeting. **Please note a small charge may be made for full copies of the agenda requested to cover administration costs.**

Access Arrangements

We will make every effort to make the meeting accessible to you. The meeting will usually be held in a wheelchair accessible venue with an induction hearing loop. We can provide the agenda or reports in large print, electronically (computer disk or by email), in Braille or on audio tape. Some formats will take longer than others so please give as much notice as possible (at least 48 hours for Braille or audio tape).

If you have any further access requirements such as parking close-by or a sign language interpreter then please let us know. Contact the Democracy Officer whose name and contact details are given on the order of business for the meeting.

Every effort will also be made to make information available in another language, either by providing translated information or an interpreter providing sufficient advance notice is given. Telephone York (01904) 551550 for this service.

যদি যথেষ্ট আগে থেকে জানানো হয় তাহলে অন্য কোন অর্ধতে তথ্য জানানোর জন্য সব ধরনের চেষ্টা করা হবে, এর জন্য দরকার হলে তথ্য অনুবাদ করে দেয়া হবে অথবা একজন দোআবী সরবরাহ করা হবে। টেলিফোন নম্বর (01904) 551 550।

Yeteri kadar önceden haber verilmesi koşuluyla, bilgilerin terümesini hazırlatmak ya da bir tercüman bulmak için mümkün olan herşey yapılacaktır. Tel: (01904) 551 550

我們竭力使提供的資訊備有不同語言版本，在有充足時間提前通知的情況下會安排筆譯或口譯服務。電話 (01904) 551 550。

اگر مناسب وقت سے اطلاع دی جاتی ہے تو ہم معلومات کا ترجمہ مہیا کرنے کی پوری کوشش کریں گے۔ ٹیلی فون (01904) 551 550

Informacja może być dostępna w tłumaczeniu, jeśli dostaniemy zapotrzebowanie z wystarczającym wyprzedzeniem. Tel: (01904) 551 550

Holding the Executive to Account

The majority of councillors are not appointed to the Executive (38 out of 47). Any 3 non-Executive councillors can 'call-in' an item of business from a published Executive (or Executive Member Decision Session) agenda. The Executive will still discuss the 'called in' business on the published date and will set out its views for consideration by a specially convened Scrutiny Management Committee (SMC). That SMC meeting will then make its recommendations to the next scheduled Executive meeting in the following week, where a final decision on the 'called-in' business will be made.

Scrutiny Committees

The purpose of all scrutiny and ad-hoc scrutiny committees appointed by the Council is to:

- Monitor the performance and effectiveness of services;
- Review existing policies and assist in the development of new ones, as necessary; and
- Monitor best value continuous service improvement plans

Who Gets Agenda and Reports for our Meetings?

- Councillors get copies of all agenda and reports for the committees to which they are appointed by the Council;
- Relevant Council Officers get copies of relevant agenda and reports for the committees which they report to;
- Public libraries get copies of **all** public agenda/reports.

City of York Council

Committee Minutes

MEETING	DECISION SESSION - EXECUTIVE MEMBER FOR HEALTH & ADULT SOCIAL SERVICES
DATE	27 APRIL 2010
PRESENT	COUNCILLORS MORLEY (EXECUTIVE MEMBER)
IN ATTENDANCE	CLLR SIMPSON - LAING

22. DECLARATIONS OF INTEREST

The Executive Member was invited to declare at this point in the meeting any personal or prejudicial interests he might have in the business on the agenda. No interests were declared.

23. MINUTES

RESOLVED: That the minutes of the meeting of the Decision Session – Executive Member for Housing and Adult Social Services held on 23 March 2010 be approved and signed by the Executive Member as a correct record.

24. PUBLIC PARTICIPATION - DECISION SESSION

It was reported that there had been one registration to speak at the meeting under the Council's Public Participation Scheme.

Representations were received from Councillor Simpson-Laing regarding agenda items 2, 4, 5 and 6 as follows:

- Item 2 Minutes – Councillor Simpson-Laing asked that it be made clear that she had not requested a Scrutiny Review on the matter of performance and the collection of rents. She had requested further information to assist her in understanding the problem.
- Item 4 – It was queried whether residents and carer groups been consulted on the change as she felt it was important the changes were fully understood prior to take up.
- Item 5 – She was glad to see the move towards providing home cooked meals as evidence shows freshly prepared food is better nutritionally.
- Welcomed the new procedures and is glad that an extra Officer is being employed to implement the procedure.
- Welcomed Pete Dwyer as the new Director.

Councillor Simpson-Laing left the meeting.

25. CYC HOME CARE - KEYLESS PROPOSAL

The Executive Member considered a report which sought approval for the implementation of a policy to discontinue the holding of customers keys in the Council's in house Home Care Services.

Officers outlined the paper which highlighted the following issues:

- The current position and the issues surrounding key-holding.
- The desired position and the proposal to extend current policy for new customers to existing customers to become non key-holding.
- The implications for existing customers – customers would have 4 options including a coded key safe and access facilitated by a nominated individual.
- The benefits to CYC Home Care Services – i.e. more efficient service.

The Executive Member queried how existing customers would be informed of the changes. Officers advised this would be done on a personalised basis by talking to each customer and assisting them to make new arrangements. With this assurance, the Executive Member agreed the recommendation.

RESOLVED: That the Executive Member approved the extension of the current practice of non-key holding in City of York Council Home Care to all its customers and operates a range of alternative property access arrangements.

REASON: The move to a completely key-less service is essential to the delivery of the savings and benefits arising from the More for York project on the Electronic Monitoring System for Home Care. It is essential to the ability of the in-house service to reduce its unit costs and deliver more time to work face to face with its customers.

26. MEALS SERVICE IN ELDERLY PERSONS HOMES - FUTURE PROCUREMENT

The Executive Member considered a report which sought approval to make changes in the provision of meals in elderly persons homes in line with the Council's Sustainable Procurement Policy.

Officers gave an update and advised that bringing the preparation of meals back into the homes would offer personalisation and provide a better nutritional service. They advised a plan was in place to make the shift from the NHS provision to home cooked meals by August 2010.

The Executive Member commented that he supported the sourcing of local produce where possible.

RESOLVED: (i) That the Executive Member approved the proposals outlined in Option 2, for the eight remaining homes to move to home cooking for all meals of the day.

REASON: To enable Managers to provide a more appropriate nutritionally balanced diet that will meet the needs of all residents in residential care homes.

RESOLVED: (ii) That the Executive Member approved the proposal to procure bulk food items and general supplies with a view to procuring as much produce as locally as possible.

REASON: To be in line with the Council's procurement strategy and will fulfil the need to ensure value for money when purchasing basic food supplies.

27. UPDATE ON THE ACCESS PROCEDURE FOR GAS SAFETY

The Executive Member considered a report which advised of the successful outcome of the trial change of procedure within Housing Services to evaluate the potential to use the Environmental Protection Act 1990, Schedule 3 to gain access to Council Homes to ensure that the Council complies with statutory duties to ensure that gas appliances within Council properties are serviced on an annual basis.

Officers gave an update and outlined Annex B which detailed the results of the trial. The trial had focused on a small number of tenants that had repeatedly denied the Council access to their homes to carry out servicing of gas appliances. Officers advised that the Courts had been co-operative with the Council throughout the trial. It is anticipated an additional enforcement officer would be required to manage the additional workload.

The Executive Member agreed Option 1, to adopt the new procedure.

RESOLVED: That the Executive Member agreed Option 1, to adopt the new procedure as Council policy.

REASON: To ensure that council tenants, residents and the wider community are safe and that the council fulfils its statutory responsibilities to annually service its domestic gas appliances.

Cllr Morley, Executive Member
[The meeting started at 4:00pm and finished at 4:50pm].

*Amended Report*

Decision Session of the Executive Member for Health and Adult Social Services

27 July 2010

Director of Adults, Children and Education

A Joint Vision for Older People's Health and Well Being in York 2010-2015

Summary

1. This paper seeks agreement to a joint vision for health and social care services in York for older people. The vision will underpin work to develop an integrated approach to commissioning and service provision, across health and social care, as a means to ensure we can better meet the needs of our population, and provide services more efficiently and effectively.

Background

2. Our Long term Commissioning Strategy for older people was agreed by Members in January 2007 and included a priority to establish joint commissioning arrangements with our health partners.
3. This was driven by the messages from local and national policies, and by consultation with older people. All of these emphasise the importance of seamless services and the need to improve health and well-being.
4. Since 2007 we have worked on a number of joint projects and set up a Joint Commissioning Group for Adults, with representation from the Council, the Primary Care Trust, NHS North Yorkshire and York (NHSNYY) and York Health Group (YHG), the local GP Commissioning Consortium.
5. The Vision has been developed through this group, with support from the Institute of Public Care, and funding made available by the Department of Health to support improvements within the Council following an inspection of Adult Social Care in 2007.
6. The Vision has been shaped by key messages from *Transforming Social Care* LAC (DH)(2008)1, and The Darzi Review – “High Quality Care for All” Department of Health, July 2008. It is influenced by *A Sure Start to Later Life: Ending Inequalities for Older People - A Social Exclusion Unit Final Report 2006*, and it draws from key strategic documents from the three local partners.
7. The Vision was drawn up ahead of the publication of the White Paper ‘Equity and excellence: Liberating the NHS’, however the contents of the vision transcend changing institutional configurations, and has been developed with both primary care and Gp commissioners in York.

Consultation

8. The draft vision has been reviewed by key stakeholders at two workshops. Representatives of York Older Peoples Assembly, the voluntary sector, York Foundation Hospital Trust, the PCT provider service, the Council's care management and provider services and the Older People's Champion, were all engaged in these workshops, and their suggestions shaped the final draft.
9. This final draft has been further consulted on through the voluntary sector, the Older People's Partnership Board and the Healthy City Board.
10. Feedback has been positive from all directions. There is a real wish to see the vision used to shape services in York for the future. Some drafting changes have been incorporated into the final version attached at Annex 1. Other comments, From York Older People's Assembly, included:
 - Concern that the intentions within the Vision be translated into outcomes
 - A wish to see partnership working as the norm and not the exception
 - Agreement that avoiding duplications and waste is a prerequisite in the current financial environment
 - A strong view that it is essential to identify the total resources spent on older people within health, social care and housing agencies, and to use pooled budgets for example in the provision of aids and adaptations
 - A view that the recognition given to the needs of single people living alone needs to be strengthened.
11. The attached draft now contains more explicit reference to the needs of single older people within paragraph 4.5. We accept and value the feedback that has been provided to date.
12. It is proposed that the other issues will be best addressed through the work currently starting to deliver a joint health and social care commissioning function.

Options

13. Option 1 is to approve the Vision as the framework for future joint commissioning.
14. Option 2 is not to approve the Vision but to ask for further work to be undertaken on any areas of concern

Analysis.

15. The Joint Vision is attached as Annex 1. It provides in our view, an inspiring description of a world where services are designed on the basis of the views of users of those services. Designed to retain and prioritise independence, dignity and choice.
16. The intention for the Vision is to define overarching outcomes, which can be applied across health and social care provision and where those outcomes can only be achieved by health and social care working together.

17. Five strategic outcomes have been developed through which the vision can be achieved. These are; that more older people will:
 - Be demonstrably treated with dignity and respect.
 - Have greater involvement in family and community life.
 - Be able to achieve greater independence.
 - Report that they are able to maintain good health.
 - Remain within a home of their own.
18. It is not intended that this statement covers every aspect of health and social care, neither should it replicate the range of statements and strategies that already exist. Instead, the intention is to define overarching outcomes, which can be applied across health and social care provision and where those outcomes can only be achieved by health and social care working together.
19. For each of the outcomes there are a range of evidence based 'outputs' and processes described, by which the outcomes should be achieved. The outcomes are also accompanied by a set of principles, which can be applied, not only to the outputs but also to any health and social care activity.
20. Each of the outcomes are based either on existing policy goals within the local authority or our local health community, or on research / audit evidence of need, and where their achievement can be measured by a set of local indicators.
21. The Vision has been developed within a very clear context of increasing demand for services and reducing financial resources and is intended to support redesign and reshaping of services rather than an investment programme for additional services. It seeks to ensure however, that such redesign and efficiency is achieved not opportunistically but within the context of a clear agreed vision.
22. Delivery of the Vision will be achieved through an integrated commissioning function. Proposals for this are currently being worked up, and more details on these proposals will be available in the autumn for the Executive Member's consideration. The comments and suggestions from the York Older People's Assembly will be fed into the work to establish a joint commissioning function, and subsequent joint commissioning plans

Corporate Objectives

23. The Vision will help to deliver the Council's objectives in respect of:

A Healthy City – we want to be a city where residents enjoy long healthy and independent lives. For this to happen we will make sure people are supported to make healthy lifestyle choices and that health and social care services are quick to respond to those that need them

Implications

Financial

24. There are no financial implications to agreeing to the Joint Vision.

Human Resources (HR)

25. There are no proposals within the Joint Vision that commit the Council to actions that have direct HR implications. However, to achieve aims of the Joint Vision will require staff to change current practice and work in different ways with older

people. Where necessary appropriate training and guidance will be provided to staff as required.

Equalities

26. The Joint Vision will support better outcomes and services for all equality strands and in particular people affected by age and disability.

Legal

27. There are no legal implications to agreeing to the Joint Vision

Crime and Disorder

28. There are no crime and disorder implications to agreeing the Joint Vision

Information Technology (IT)

29. There are no IT implications to agreeing the Joint Vision

Property

30. There are no property implications to agreeing the Joint Vision

Other

31. There are no other implications

Risk Management

32. The risk associated with the demands for services from an ageing population is recorded on the Council's risk register. The recommendation of this report will potentially help to reduce this risk. There are no new risks associated with adoption of the Vision.

Recommendations

33. It is recommended that Option 1 is adopted:

To approve the Vision as the framework for future joint commissioning

Reasons: To ensure we can better meet the needs of our population, and provide services more efficiently and effectively

Annex

Annex 1 - The vision for older people's health and well being in York 2010-2015

This page is intentionally left blank

The vision for older people's health and well being in York 2010-2015

1 Introduction

- 1.1 The overarching vision for older people in York, to be achieved over the next five years, is one where **a higher proportion of older people remain within the community, having fewer hospital and care home admissions and are able to enjoy: greater independence; a wider choice of accommodation options; and greater social engagement.**
- 1.2 During the same time period, the deteriorating financial climate combined with the growth in the numbers of older people, will inevitably mean meeting greater demand with fewer resources.
- 1.3 This makes it essential to transform the services that health and social care fund, to reduce demand through successful and targeted health and social care interventions and to avoid duplication and waste.
- 1.4 If the vision is to be achieved then health commissioners and the local authority need to work ever more closely with each other and with voluntary organisations and other third sector bodies, in order to agree common targets for improving the health and well-being of local people and communities. This will require an improved understanding of need, and the ability to better define service requirements and use of resources.
- 1.5 **Five strategic outcomes have been developed through which the vision can be achieved. These are; that more older people will:**
- **Be demonstrably treated with dignity and respect.**
 - **Have greater involvement in family and community life.**
 - **Be able to achieve greater independence.**
 - **Report that they are able to maintain good health.**
 - **Remain within a home of their own.**
- 1.6 It is not intended that this statement covers every aspect of health and social care, neither should it replicate the range of statements and strategies that already exist. Instead, the intention is to define overarching outcomes which can be applied across health and social care provision and where those outcomes can only be achieved by health and social care working together.
- 1.7 For each of the outcomes there are a range of evidence based 'outputs' and processes described, by which the outcomes should be achieved. The outcomes are also accompanied by a set of principles which can be

applied not only to the outputs but to any health and social care activity.

- 1.8 Each of the outcomes are based either on existing policy goals within the local authority or the health community or on research / audit evidence of need, and where their achievement can be measured by a set of local indicators. The final section on implementation begins to explore some of these issues.

2 Principles

Below are outlined a set of principles designed to underpin the vision for older people in York. They are intended to be used by staff and managers in order to guide them in a range of situation regarding older people not just in delivering the specific outcomes linked to the vision statement. In this light all professionals are responsible for delivering all the outcomes, not just those that might be seen as belonging to one particular professional group.

- 2.1 Together we will ensure that our services are available to all irrespective of gender, race, disability, age, religion or sexual orientation and to pay particular attention to groups or sections of society where improvements in health and life expectancy and quality of life and sense of wellbeing are not keeping pace with the rest of the population.
- 2.2 Our services will reflect the needs and preferences of the people who use our services, of their families and their carers.
- 2.3 We are jointly committed to providing best value for taxpayers' money and the most effective and fair use of finite resources. We should always ask ourselves 'why shouldn't we work together' rather than 'should we do this together'.
- 2.4 We will give the people who use our services, their carers and the public the opportunity to influence and scrutinise our performance and priorities; and people, public and staff will be involved in relevant decisions.
- 2.5 We will expect all our staff, and staff in the services we commission, to deliver quality care and support. Wherever it makes sense we will deliver services through integrated teams, and support staff to work together to create simple access to the care and support our customers need.
- 2.6 We will work together to ensure that skill development and workforce planning promote quality and encourage integrated working between health and care services.

Outcomes and outputs that flow from the vision

3 Outcome 1 – All older people are demonstrably treated with dignity and respect

- 3.1 Services should only be purchased from agencies and organisations that have a written and verifiable policy with regard to dignity¹.
- 3.2 People with dementia should receive help and support from staff knowledgeable about their condition whether in a social care or a health care setting².
- 3.3 Carers of older people, particularly where they are caring for someone with dementia, should be offered an agreed package of support. This should be flexible enough to cope with unexpected changes in circumstances, from the point of diagnosis onwards,³ as well as information about the relevant condition.
- 3.4 There should be an improved inter-agency response to first contact. For example; whoever responds to the first contact with an older person, should be skilled enough to find out the whole story. Sufficient time should also be allowed for that person to tell their story in their way and at their pace, and appropriate arrangements should be in place to allow information to be shared between agencies.
- 3.5 In care settings where there is a key worker the older person should always be offered a choice of who that key worker is. The same should be true when any member of care staff is asked to carry out intimate personal care.
- 3.6 Where older people have a terminal condition it is important that they die in a place of their choosing and that services work together to help achieve this⁴. Where people indicate they wish to make 'living wills' staff should support and encourage this. Peoples wishes with regard to faith and beliefs should also be recorded and respected.

¹ *Need to make sure this is included in the new home care contract and should be raised at the provider's forum.*

² *Development of the Dementia psychiatric liaison service. Shared pathway of care. Carers passport about that person.*

³ *See York Strategy for Carers 2009-2011 and Dementia Review, Nov 2008.*

⁴ *See End of Life Strategy (under development) and Recommendation 5, End of Life, Delivering Healthy Ambitions*

4 Outcome 2 – More older people have greater involvement in family and community life

- 4.1 All older people should have the opportunity, regardless of incapacity to engage in activities that they enjoy, whether living in their own homes in health care setting or in a care home⁵. Older peoples own contribution to the community through employment and work as volunteers should be recognised and encouraged.
- 4.2 Good up to date information about the range of services and opportunities should be available to all older people. There should be an offer of support available to those who need it, so that they can take up community provision rather than people simply being signposted to alternative services.
- 4.3 The local authority and health agencies need to work together to understand where there are risks and barriers to older people participating in community life, eg, snow clearance, access to transport, presence of banks and post offices, etc. Leisure services should ensure that there is proportionality in the activities they offer to ensure they are relevant to and accessible by older people.
- 4.4 Funding partners need to explore investing in a programme of community leadership. Local existing leaders of voluntary effort should be encouraged and resourced to identify and deliver greater community support for older people⁶.
- 4.5 The impact of living alone in older life, whether as a result of divorce, death, separation , or never having been in a partnership will need to be a consideration in reaching and finding people and in offering support.
- 4.6 All policies of the local authority and health commissioners should recognise that by 2030 25% of the population of the City will be aged over 65. This should be reflected in the type of services and facilities that are available.

⁵ See *Priorities and Gaps Older Peoples Services to Promote Health and Well- Being Feb 2009*

⁶ See *The Westfield Project led by economic development*

5 Outcome 3 – More older people are able to maximise their independence

- 5.1 Older people should always be consulted about any service to be provided and their wishes and views ascertained. Where desired, the option of a personal social care budget should be offered that is sufficient to meet peoples assessed needs. There should be encouragement for older people to self manage health conditions, rather than allowing a potential crisis to occur⁷.
- 5.2 There should be a greater emphasis on collecting the views of service users, carers and those who do not use health or care services but could benefit for doing so. For example, there should be a range of ways to collect feedback, including internet based forums for service users and carers to express consumer views about the care and health services that they receive. Such collections should avoid duplication across agencies and wherever possible should be combined.
- 5.3 There should be an increased use of technology focussed on alleviating specific risks to service users. The range of technological services available should be explained to service users and carers. Use of technology should be planned and of demonstrable benefit, and should include opportunities for short term usage designed to improve independence and self care⁸.
- 5.4 Older people should be encouraged and enabled to self manage their health conditions.
- 5.5 Health and care assessments should have an emphasis on what people can do as well as what they cannot and should record activities that people used to participate in and why they no longer do so⁹. There should be a statement about the degree of independence and choice the older person would like to achieve.
- 5.6 Longer term and intensive care and support should be planned and provided only after looking at rehabilitation and 'reablement' opportunities, which are intended to help people regain skills and confidence to care for themselves. This will include technology based supports. All of which could increase independence and reduce reliance on care services.

⁷ Recommendation 1 & 9, Long term conditions, Delivering Healthy Ambitions

⁸ Electronic Home Care Monitoring, Blue Print for Adult Social Care Sept 2009

⁹ See Priorities and Gaps Older Peoples Services to Promote Health and Well- Being Feb 2009

6 Outcome 4 - More older people report that they are able to maintain good health

- 6.1 Health and care services should proactively identify those at risk of hospital admissions and then act to reduce the risks. Alternatives to hospital admission should be available for those who can be cared for outside an acute hospital setting. This will include good care at home as well as care in community based units. These options should be available to avoid admission and to speed up discharge
- 6.2 Planning for discharges from hospital needs to improve. An older person should only be discharged from hospital when it is both timely and safe for this to occur. Greater attention should be paid to older people's confidence to manage on their own as well as their physical capabilities.
- 6.3 Where an older person has suffered a stroke then there should be improved restoration of functionality and a diminution in the number of older people who have further strokes or TIAs. The levels of permanent impairment to individuals should be reduced¹⁰.
- 6.4 Where older people have had a fall that has required a health service intervention, then they should receive a targeted falls prevention service. This is particularly appropriate for older people who have had a fall in a care homes¹¹.
- 6.5 There should be a targeted increase in the detection of continence problem in older people with an equivalent diminution in the proportion of older people with a continence problem who are catheterised or use pads to 'manage' the problem¹².

¹⁰ York hospital under achieved in terms of its 2008/09 meeting of the stroke standard with only 28% of stroke patients in 2008-09 spending time on a specialist stroke unit. Nationally a third of all patients admitted to hospital for a stroke have previously had an earlier stroke or a TIA. 11% go on to a care home 2% within two weeks.

¹¹ See *Priorities and Gaps Older Peoples Services to Promote Health and Well- Being Feb 2009 and York Health Group Commissioning Intentions 2009/2010 – 2010/2011*. Nationally. 80% of hip fractures are to women. Average age is 83. The 2007 RCP Audit showed that 22% of all hip fractures occur in care homes. 27% of older people who have had a hip fracture go on to have a continence problem brought about from their hospital admission although in 60% of those cases no referral is made to a continence service. 11% of patients have an unplanned re-admission to hospital within 12 weeks of their fall. There is a strong connection between the falls and depression, with a 30% increased risk of hip fracture for older women if they are suffering from depression.

¹² People with continence problems often suffer for years before they reveal their problem. Just over half of hospital sites and only a third of mental health sites offer structured training in continence care. Documentation of continence assessment and management has been described nationally as "wholly inadequate". 90% of PCTs have a written policy saying continence products (pads) are supplied on the basis of clinical need

- 6.6 There is a need for improved services focusing on depression in older people particularly where the person has experienced the bereavement of a long term life partner¹³.
- 6.7 All older people should have access to regular dental care regardless of where they live and their ability to access a dental surgery unaided¹⁴.
- 6.8 Where older people have difficulty in cutting, or are unable to cut, their toenails, access to an appropriate service that can help with this should be made.¹⁵

yet 73% limit the number of pads to four a day. The average age of those known to the PCT with a continence problem was 80.

¹³ The majority of older persons who commit suicide are widowed although only a small proportion of the oldest old have experienced the recent loss of a partner. However in absolute terms the oldest old men experience the highest increase in suicide risk immediately after the loss of a spouse.

A comprehensive Dutch study in 2008 showed there was a link between a history of depression and Alzheimer's. Amongst those who have experienced the death of a spouse in old age 30-60% meet major depression criteria at one month, 24-30% at two months and 25% at three months. The most effective interventions at alleviating social isolation are group activities at a social and educational level. Individual interventions are less effective but work best where the giver of support is matched in terms of age and interests with those of the recipient.

¹⁴ Older people suffer a wide number of likely additional dental problems yet conversely are less likely to receive treatment. For example; The Adult Dental Health Survey 2008 for Portsmouth reviewed dental care of older people in care homes. Found that 465 had no teeth 73% had dentures, 24% suffered oral pain, 29% not seen a dentists in ten years, 25% felt they needed dental treatment tomorrow. The additional problems include those that stem from the type of medication being taken impacting on the capacity to swallow and the likelihood of introducing dental decay, through a diminution in effective soft tissue holding teeth in place and softer diets, which require minimal chewing and thereby reduces stimulation of muscle tone and the condition of the oral tissues. As a consequence, sugar is retained in the mouth for a longer period of time which promotes dental caries.

¹⁵ Help the Aged reported in 2005 that over two thirds of older people have foot problems and there is some evidence that the proportion may be higher as many people are too embarrassed to seek help. The longer term impact of denying treatment to those considered to have a low risk is yet to be established although Malkin et al suggested that 25% of people needing foot care are not receiving it.

7 Outcome 5– More older people remain within a home of their own.

- 7.1 There should be a continued development of a programme of extra care housing particularly providing a stimulus to the independent sector to develop provision for older owner occupiers. There is a need to develop ECH on a community basis rather than a just a housing basis, ie that people can receive the range of extra care services within particular given neighbourhoods¹⁶.
- 7.2 There needs to be much greater clarity about who the Local Authority would fund in residential care and why¹⁷.
- 7.3 Older people need to be assured that when it comes to hospital discharge they will have the opportunity to fully explore the choices and the implications of those choices that are available to them.
- 7.4 Where aids and adaptations do not exacerbate people's dependency then there should be a greater funding emphasis on providing property adaptations. Funding partners should also be aware of the costs and benefits of the adaptation programme and the impact of delays in delivering adaptations¹⁸.
- 7.5 Over and above access to health and care provision older people's confidence to remain in the community is based on their ability to maintain their property, play a part in their neighbourhoods and to feel safe. The local authority will work with a range of agencies across the City to ensure that these ambitions can be achieved and that older peoples feelings of safety and security are regularly monitored.

¹⁶ This is similar to the Dutch model of integrated neighbourhoods called 'Woonzorgzones'. These are now being planned in about 30 neighbourhoods and villages all over the Netherlands. The woonzorgzones are geographical areas that offer round-the-clock care and a certain percentage of adapted housing within 200 m walking distance of integrated service.

¹⁷ The EPH review should respond to this (likely that care home provision will be seen as for those needing high physical care needs and dementia where people are at risk).

8 Aspects of implementation

- 8.1 There should be improved measurement of service success by outcomes rather than outputs. In achieving this the test should be who can provide the best outcome at the best possible price rather than professional groups being allowed to 'colonise' areas of service provision, ie, we are the only group who can deal with dementia, continence stroke etc¹⁹.
- 8.2 There should be a greater capacity to monitor and measure why hospital admissions and care home admissions occur and those results fed back into the commissioning process. From this there will be an increased capacity to target key populations most at risk.
- 8.3 In order to consolidate skills and knowledge, reduce costs and give service users a more consistent experience, consideration should be given to the balance of services necessary to achieve the outcomes required within the funding available.²⁰
- 8.4 There should be less repeat assessments by different professional groups and organisations and greater service user satisfaction with the assessment process. Where assessments are completed by 'front door' services they should be accompanied by good risk analysis.
- 8.5 There should be a greater transferability of skills across health and social care.
- 8.6 There should be an assumption that the delivery of a paid for care and health service should be a last resort. Therefore, health and care should look to provide greater support to family, friends and communities to support older people rather than fund a paid service. Consequently, there should be a shift in expenditure away from funding whole services to one of investment, wherever possible in supporting and extending an existing activity. A greater test of investment should be applied, ie, if this amount of money is spent what is the desired return from that expenditure and is this cost effective.
- 8.7 Where consultation exercises are undertaken the norm should be that they are jointly undertaken between health services and the local authority unless there is a good reason for not doing so.
