Strategic Review of City Centre Access and Parking

Why are we doing the review?

- A requirement of the Executive decision in November to permanently extend the footstreet, to be completed by the implementation of the permanent footstreets in September 2021
- To allow Executive to make a decision as to whether to proceed with St George's Field multi storey car park, decision required in October 2021

 To guide the development of Local Transport Plan 4, which commences September 2021

Formal Exec decision and proposed delegation

November Executive Footstreets Report recommendation:

Undertake a full strategic review of the city's parking and disabled access offer as set out in this report, to be completed by Summer 2021 at a cost of up to £40k from the existing footstreet engagement and Local Transport Plan 4 budgets.

Reason: To ensure the permanent footstreet extensions set out above are accompanied by appropriate mitigations for those who have been affected by the revised footstreets and to improve city centre accessibility.

The full terms of reference for the review will be scoped out and agreed with the **Executive Member for Transport**, but will include:

- A full review of the Shopmobility offer
- A feasibility study for a city centre shuttle service for people with mobility issues
- Identify two car parks with potential for achieving gold standard for disabled users
- A feasibility study to explore options for a delivery hub model for the city centre
- Consider through engagement the recommendations set out in the independent review of York's access offer
- Continuing dialogue with disabled residents on how we ensure that York continues to improve and enhance its access offer, and to continually improve these mitigations and help explore solutions together that accompany any permanent changes

Aim

To undertake a strategic review of the access requirements and existing CYC car parking provision in a rapidly evolving city centre.

Scope and Key Principles – City Centre Access

- How do we best manage the accessibility of an evolving city centre?
- Builds on the engagement work and responds to the issues raised by the operation of, and the extension to the footstreets.
- Focus on disabled groups, businesses and deliveries, cyclists, taxis and residents who live within the footstreets.
- Does not focus on strategic transport decisions, which will be part of LTP 4.

Scope and Key Principles – CYC Car Parking

- We are still in a position of recovery, the city centre is changing and parking demand is state of flux, so now is not the right time to try to identify required capacity.
- CYC car parks generate £7m revenue each year
- Seeking to bring about change through reducing council provision without LTP 4 and associated planning policies could lead to the private sector filling the gap and benefiting from the parking revenue.
- This review will inform a strategy of how any future decline in parking demand is managed and which council car parks would be prioritised for investment and improvements.
- Therefore, the aim is to review the councils assets and create long term plan to manage any future natural or LTP 4 policy driven decline in parking provision.

Objectives

City Centre Access

City Centre Car Parking

Improve disabled access

Ensuring sustainable delivery solutions for city centre businesses

Review the operation of Taxis

Explore
how all
cycling
groups
access and
navigate
the city
centre

understand and respond to access needs of city centre residents

Provide improved evidence base for future decision making

Identify
strategic
priority car
parks for
investment
and retention

Optimise and future proof CYC car parks including revenue consideration

Respond to disabled access parking requirements

Guide future Car Free City Centre considerations

Public and stakeholder engagement led

Technical and evidence base review led

Outcomes

City Centre Access Residents within Cycling **Disabled Access Deliveries Taxis Footstreets** Review Map city **Explore Explore** Identify Access for Trades disabled Disabled centre operation delivery Access off street loading people/ of cycle cycle cyclist Access bays Service modes of hubs Access parking couriers routes access access

City Centre Parking

Evidence base

Priority car park locations

Optimise and future proof CYC car parks

Disabled access and parking

Collate all available data Implement measures to improve future evidence base Provide a matrix for assessment of car parks to produce hierarchy

Assess car parks to create hierarchy

Maximise CYC land assets Improve customer experience and quality of car parks Review pricing and payment options to allow flexibility

Optimising capacity and revenues

EV Charging Maximising use of Park and Ride

Implement City Centre Access recommendations for Blue Badge parking Implement improvements to Shop-mobility service

Identify gold standard accessibility car parks

Methodology - Assessment Matrix and Hierarchy

Collate available data

Parking

- Revenue generation/Value per space
- Current usage
- Efficiency of space

Transport

- Location of parking and access to car park from arterial route
- Access route to city centre/destination from car park
- Alignment with LTP and car free city motion

Property

- Asset Value

Alternate development use - planning

External Influences

- Impacts on demand New developments / Hotels / Res park / Car free developments / Sustainable Transport options
- Economic Impact the role of parking in the economic sustainability of the city
- Who should parking be aimed at?
- Private parking Supply and market interest

City Centre Access engagement

• Respond to the outcomes of the City Centre Access engagement

Assessment matrix:

Profile each CYC car park using themes (including Park and Ride)

Hierarchy created

combining profiles and external information to target future investment

Maximise land assets according to outcome

in car parks

Optimise and future proof CYC car parks

- **Gold Standard**
- Use of technology
- **EV Charging**
- **Flexible charging**

Implement measures to improve future evidence base

Use of technology

Inform future asset decisions

> Informs LTP 4

Approach

Exec Member: Cllr D'Agorne

Project Board: Neil Ferris / Tracey Carter / James Gilchrist / Tony Clarke /

Dave Atkinson / Nick Collins / Patrick Looker

Project Lead: Andy Kerr / Katie Peeke-Vout

Engagement Lead: Gareth Wilce / Katherine Atkinson

External Support: To be confirmed

Key Stakeholders: To be confirmed

Exec agreed budget: £40K (£16k unspent engagement budget and £24k LTP4)
