LTP3 Draft Vision

Thriving City

Modern un-congested transport International connectivity

Halting the rise in childhood obesity

Active lifestyles for good physical/mental health

Improve access to healthcare facilities

Promote activity
friendly opportunities
notably to walking and
cycling

Government Guidance etc.

(All) Residents sharing economic , environmental and social well-being

Improved access to amenities

York is a city making history and the people that live and work within it and those that come to visit it are its future. Dur vision for enabling everyone to undertake their activities in the most sustainable way is to have a transport system that:

- Has become less dominated by motorised transport;
- Influences and adapts to changes in land use to minimise the need to travel;
- Enables people to travel in safety, comfort and security, whatever form of transport they use;
- Provides balanced and equitable access to and supports opportunities for employment, education, training, good health and leisure, and
- Makes best use of existing and new technologies and service delivery improvements to minimise the impact on and react to climate change and local air quality.

Less congestion and pollution

Reliable public transport

Minimising and reacting to climate change

Fewer killed and seriously injured (on the transport network)

Reduce the barriers for young people for accessing opportunities
