### Making Representations:

**Process:** The Acomb Front Street Phase 2 public engagement commenced on 26 February 2024 and ran to 24 March 2024. The purpose of

the open public engagement work was to test the ideas set out in the Phase 2 project scope and determine the community priorities in the context of the cost and desirability. Learnings from the previous community consultation (Future of Acomb Front Street Study 2021) and community petition July 2023 were also carried forward.

The public engagement sought feedback on :-

- enhancing the area through better placemaking, creating a more people friendly space and reducing the number of bollards
- creating a more accessible destination, with wider, more generous pedestrian crossing points, new accessible toilet facilities and improved blue badge parking
- extending the benefits beyond the high street to better connect local amenities
- longer-term aspirations, including but not limited to looking how to reduce the vehicle dominance in Front Street or the adoption of private frontages

An accessible mix of engagement methods were used to allow for the greatest reach into the community, including in person public meetings/drop-in events, stakeholder meetings and online survey, plus paper-based format.

The community response was tremendous and generated 900 completed surveys, and more than 5,000 comments to be analysed.

The Executive report will include a detailed summary of the engagement feedback received.

The Acomb Front Street Phase 2 public engagement commenced on 26 February 2024 and ran to 24 March 2024. The purpose of the open public engagement work was to test the ideas set out in the Phase 2 project scope and determine the community priorities in the context of the cost and desirability. Learnings from the previous community consultation (Future of Acomb Front Street Study 2021) and community petition July 2023 were also carried forward.

The public engagement sought feedback on :-

- enhancing the area through better placemaking, creating a more people friendly space and reducing the number of bollards
- creating a more accessible destination, with wider, more generous pedestrian crossing points, new accessible toilet facilities and improved blue badge parking
- extending the benefits beyond the high street to better connect local amenities
- longer-term aspirations, including but not limited to looking how to reduce the vehicle dominance in Front Street or the adoption of private frontages

An accessible mix of engagement methods were used to allow for the greatest reach into the community, including in person public meetings/drop-in events, stakeholder meetings and online survey, plus paper-based format.

The community response was tremendous and generated 900 completed surveys, and more than 5,000 comments to be analysed.

The Executive report in July 2024 included a detailed summary of the engagement feedback received to inform the high level principles and next steps for the project.
