CONSULTATION ACKNOWLEDGEMENT FORM

Public Path Diversion Order

PROW No	Parish	Status of Path	Path Number
I/PROW/Skelton	Skelton	Footpath	7 & 8

Name and Address of Consultee
 Ramblers Association York Group, Footpath Secretary
 33 Millgate YORK YO26 6AT

Declaration of Support/Objection

We support/object to* this Public Path Order (if objecting, please give your reasons, using a separate sheet if necessary. Comments in support of the Order may be given if desired.)

We object to this Order based on the map provided. The existing FP B-A - Edge of your map lies within the parcel to the SE of point A, as diverted in 1977 and indicated by a NYCC Stile & ~~gate~~ way mark at point A. * Any diversion proposal should be at no cost to your PROW budget, as it is essentially for the benefit of the landowner. Any diversion onto a field edge could result in increased costs to your maintenance budget and should be resisted. Some people may consider the footbridge ~~at~~ near point D to be in need of repair, but this may be in Shipton Parish (North Yorkshire) - perhaps you could advise within. Any diversion would be of beneficial interest to the landowner of from 0.1 to 0.3 hectares (depending on the crop) as well as the time taken to clear a cross-field path, whilst extending a walk A-E by around 10 minutes. Would it be intended to use the full width of the grass track a few metres in from the top of the bank C-D-E, with limited views, or the grass at the field edge (part of a *Delete as applicable environment scheme?). The former does not go into the field corner at C, but sweeps round the corner.

Name	Signature	Date
D G Dennis		3/9/06

Please return this completed form to:
 Public Rights Of Way Officer, City of York Council, Department of Development Services, 9 St Leonard's Place, York YO1 7ET.

Between B & C the track is a few metres into the field & more specifically passes around a Pylon stay around 3 metres in.
 Between E & D you show an impossible route in part, along the edge of the Drain which is impossible to provide a readily usable path.

* See our letter to Robin Carr of 23/10/06.
