Subject: FW: Premises license application for Eastfield showfield, Eastfield Lane, Dunnington, York, YO19 5ND

Dear Sirs

Public Protection objected to the above premises license application on grounds of public nuisance, however, I support the conditions attached by the Police in relation to controlling noise from the site and have mediated with the conditions below with the applicant. As long as these conditions are attached to the premises license then our objections are withdrawn.

Conditions

1. 1. A detailed plan showing the exact layout of the site and proposed sound monitoring locations, at least 28 days before any event. A copy shall be sent to the Public Protection Environmental Protection Unit and also the Licensing Unit. The plan shall include a sample of the leaflet to be sent to comply with the below condition and which addresses will receive the leaflet.
2. 2. Generators shall be placed away from residential properties and if possible behind a building or screen.
3. 3. The quietest generators available shall be used.
4. 4. Before the event the designated complaints phone shall be set to vibrate and the Complaint Hotline number tested to make sure it is working.

Should you have any further queries please contact me on 01904 551580.

Regards

Michael Golightly
Technical Officer

Hi Michael

We agree to all the conditions that you have set in this email. Thanks very much for your help in this matter.

Dear Neil Hudson

Further to our telephone conversation on Tuesday I would like to agree the following conditions to be attached to your premises license. Please read through these and let me know if you agree to them by replying to this email and I will forward my comments to the Licensing department. If you have any questions please contact me on 01904 551580 and we can discuss any concerns you have. If you do not reply by the end of today or do not wish to agree to the below conditions public protection will be obliged to object to the application on grounds of public nuisance.

2. A detailed plan showing the exact layout of the site and proposed sound monitoring locations, at least 28 days before any event. A copy shall be sent to the Public Protection Environmental Protection Unit and also the Licensing Unit. The plan shall include a sample of the leaflet to be sent to comply with the below condition and which addresses will receive the leaflet.”

3. Generators shall be placed away from residential properties and if possible behind a building or screen.

4. The quietest generators available shall be used.

5. Before the event the designated complaints phone shall be set to vibrate and the Complaint Hotline number tested to make sure it is working.

I look forward to hearing from you.

Regards

Michael Golightly
