

In the matter of the City of York Council Standards Hearing of the 7th September 2021 I [REDACTED] submit this witness statement to counter untrue statements in the complainant's statement that I have the knowledge to comment on.

I can not comment on the disputed telephone call but elements of my statement will clearly highlight the nature of the complainants given their behaviour to myself and other elderly neighbours in the street.

There were parking issues in the street when No 289 operated as the doctors surgery but the doctors and practise manager always tried to solve problems and deal with residents in an amicable manner.

[REDACTED]

Our lives have been a living hell since Mrs Moore moved into the property and I strongly dispute the statement in the agenda - page 21 that they have good/friendly relations with local residents, that's simply not true.

Mrs Moore deliberately parks her car near to my gatepost even when there are no cars parked on the foot clinic to deliberately make it difficult for me to get out of my drive, I am grateful to [REDACTED] or leaving a trailer outside my driveway on the road without which I am sure my access would be blocked by Mrs Moore's customers cars, I am also grateful to [REDACTED] for standing up for me and other elderly residents on this street to the aggression shown by Mrs Moore.

She has knocked at my door on many occasions in an aggressive manner and frightened [REDACTED] on more than one occasion.

All we want is to live out our lives in peace and quiet without everyday being a battle to get out of our houses, the owners can't be bothered to try and get vehicles on the foot clinic drive which the doctors used to do and we were seeing more vehicles driving on and parking on the verge.

I [REDACTED] signed the letter asking Mark Warters to do something about this, we suggested birds nose fencing and we were delighted when it started to go up last year, we live here and want our verge protecting and not turning into a car park or ruined with cars driving over it.

When the fencing went up and the gap was left opposite the foot clinic Mrs Moore took to parking on that section of verge and if she saw me sat grinning at me in another attempt to upset me.

We are grateful for the support over the years given by Mark Warters, he got our white line markings outside the driveways but too many foot clinic cars ignore them.

To give you a final idea of the character of these people they put their rubbish bins on my land and take pleasure in banging the bin lids on the side of [REDACTED] a matter that we have had to call the police out about.

Yours Faithfully,

[REDACTED]
