

During March 2022, York city centre experienced a 2% increase in footfall with respect to February 2022 and a 108% increase with respect to March 2021. Visitor demographics were overall consistent with February but showing a higher proportion of visitors aged 55 and above, and a lower proportion of one-time visitors throughout the month. Trips to the city centre from over 50 km represented 39% of the total number of visitors.

All data is anonymised, aggregated and GDPR compliant.

Footfall

Powered by:

Footfall is measured by the number of visits detected by the presence sensor located in the city centre. This metric is presented at the monthly (Fig.1) and daily levels (Fig.2), together with location benchmarks (Fig.3).

Fig.1. Number of monthly visits to the site.

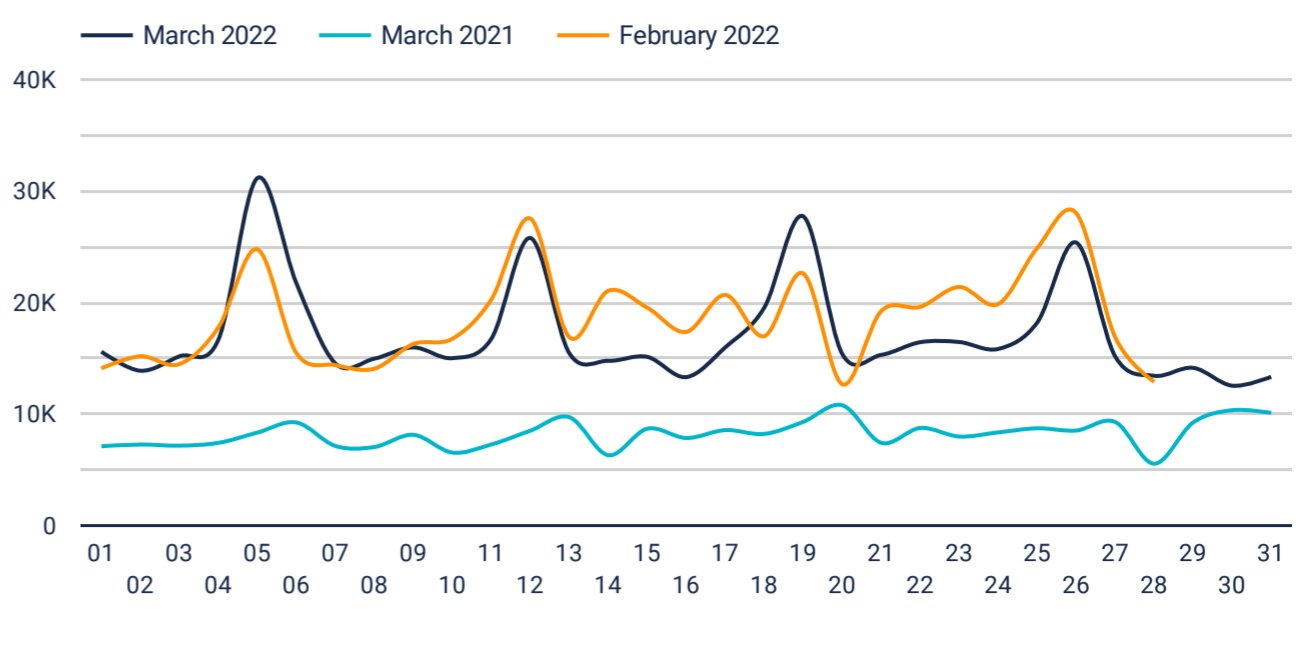

Fig.2. Number of daily visits to the site.

Footfall in March 2022 saw an increase of 2% with respect to February 2022 and an increase of 108% with respect to February 2021.

The 5th and 19th of March represented the maximum daily footfall days of the month.

The daily average number of visits per week experienced a steady increase from mid January until the end of February. Weekly volumes during March remained stable and lower than the second half of the previous month.

Comparison of Average Visits

Visitors to the City Centre

Powered by:

A number of features are understood for the users sighted by the presence sensor. Their distributions by month are presented here.

With respect to February, March 2022 presents no significant changes overall. However, the following small changes can be noted:

- A higher proportion of visitors aged 55 and above.
- A lower proportion of one-time visitors throughout the month.

Age

Fig.4. Age profile by month.

Spend Power

Fig.5. Spend Power profile by month. Spend power measures potential spend comparing to the regional score. (2)

Visit Frequency

Fig.6. Visit Frequency profile by month. Visit frequency is defined as the number of unique days a person visits the vicinity of the presence sensor in a month. (O2 undergoing change in methodology)

Gender

Fig.7. Gender profile by month.

Time of Arrival

Where Do Visitors Come From?

Powered by:

Mobile data allows us to understand where visitors to the city centre have come from. This is shown below at local authority level (Fig.9) and postcode sector level (Fig.11). A distribution by distance to the small cell displays in Fig.10.

The local authority of York was the home location for 28% of the visitors, while it represented 25% of the total in February. 37% of the users sighted live within 0-10km to the site. Long distance visitors represented 39% of the total.

Local Authority	March 2022	February 2022	March 2021
York	28.26%	24.97%	56.21%
East Riding of Yorkshire	5.64%	5.5%	4.27%
Selby	4.9%	4.69%	7%
Harrogate	4.52%	4.36%	7.23%
Leeds	4.31%	3.97%	2.77%
Hambleton	4.2%	4%	7.52%
Ryedale	2.82%	2.84%	2.88%

Spend Data (Quarterly)

Powered by:

The following totals represent spend with merchants and on VISA cards in the city centre. All the figures below refer to the postcode district YO1, except for Fig.16 and Fig.17, where insights refer to the post town of York. This data will only be updated on a quarterly basis as it is released by Visa.

Fig.12. Total spend with city businesses in pounds by quarter.

Fig.13. City resident spend with offline and online businesses by quarter.

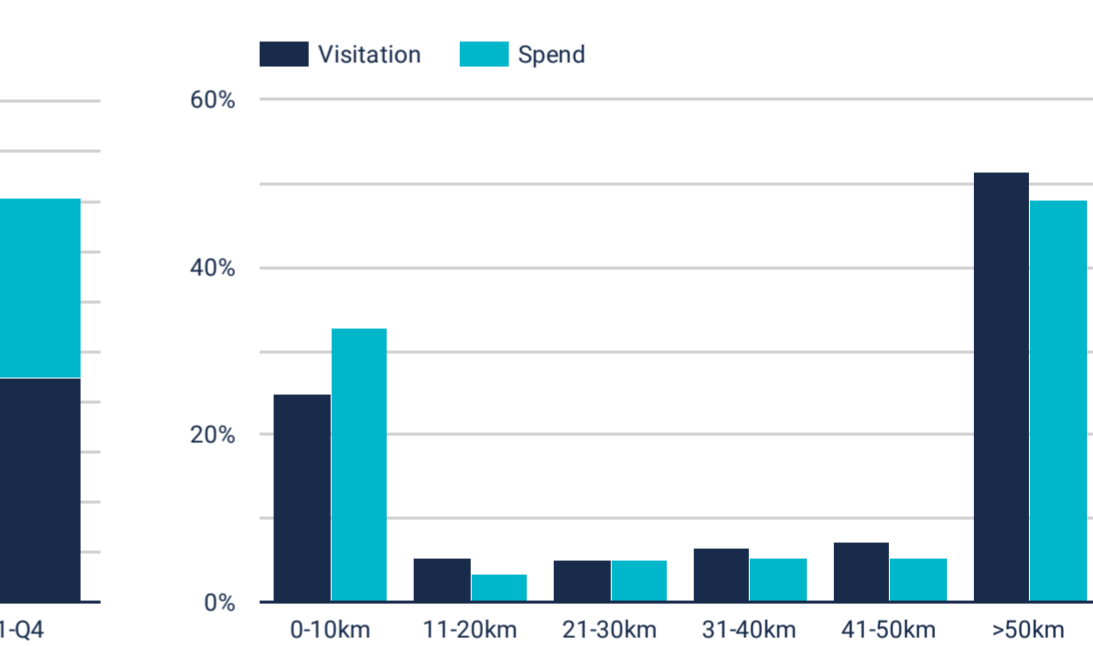

Fig.14. Visits and spend in the city centre by origin in last quarter. Visitation data is powered by o2.

Category	Total Spend (£)			Average Spend (£)		
	2021-Q2	2021-Q3	2021-Q4	2021-Q2	2021-Q3	2021-Q4
Restaurants	34,824,605	59,130,347	62,416,161	17.4	17.4	16.4
Retail & High St	18,082,874	21,262,364	26,635,611	32.6	33.8	33.0
Clothing	14,913,223	16,194,976	17,820,603	43.1	42.2	44.5
Hotel/Accommodation	3,216,248	5,522,684	3,898,441	53.2	62.7	54.9
Food & Drink	2,322,205	2,722,518	2,771,193	8.0	7.9	8.3
Wholesale	913,308	1,788,856	1,963,869	42.2	50.7	52.2
Personal Services	1,982,893	1,587,077	1,540,028	56.2	44.1	45.2

Background - About the Data and Limitations

The mobile phone device of o2 users establishes connection with the presence sensor when passing near it. In the process, the presence sensor identifies the device and O2 provides Movement Strategies (A GHD company) with anonymised, aggregated and GDPR compliant data of the visitors. Advanced modelling is applied to extrapolate volumes to all presence in the city, not just those on the O2 network. This is a novel dataset, currently in use by a limited number of BIDs in UK. It supplements traditional footfall information by understanding who is the visitor.

1. The 'Average client' includes combined insights from presence sensors in Bath, Bristol, Belfast, Giant's Causeway, York, Manchester and Liverpool.
2. Spend power is derived through a combination of several measures (e.g. mobile device cost, frequency of upgrade, home postcode and a number of other behavioural inputs).
3. Due to privacy constraints, postcode sectors from which the visitation at the site is lower than 10 people are shown as 0.

Bespoke reports and further information are available to levy payers on request.
