Please briefly describe the support you are providing to people for less complex discharges that do not require formal reablement or rehabilitation – e.g. social support from the voluntary sector, blitz cleans. You should also include an estimate of the number of people who will receive this type of

service during the year.
The Home from Hospital Scheme provides critical support to pathway 0 patients. We also have the York Integrated Care Team who carry a caseload of 3,000 frail patients and support discharge and admission avoidance. Other schemes that will support this include, the Supported Discharge Service. We have a Hospital at Home Service as well as utilising the YICT to provide antipatory care which will help to keep patients out of hopsital in the first place. Based on May 2024 data (latest data), 73 patients per month are receiving voluntary care sector support to enable Pathway 0 discharges, and we therefore estimate that 876 people will require this type of service per year.
