

AGENDA SUPPLEMENT

Council

To: All Members of Council

Date: Thursday, 17 September 2026

Time: 6.30 pm

Venue: The Guildhall, Coney Street, York, YO1 9QN

The agenda for the above meeting was published on **Wednesday, 9 September 2026**. The attached additional documents are now available for the following agenda item:

9. Recommendations of Executive (Pages 3 - 8)

To receive and consider for approval the recommendations of Executive arising from its meeting on Wednesday, 9 September 2026.

13. Appointments and Changes to Membership (Pages 9 - 10)

To note changes to membership of committees.

14. Motions on Notice (Pages 11 - 20)

To consider amendments to Motions on Notice.

This agenda supplement was published on **14 September 2026**

**Extract of the Notice of Decisions taken at the Executive meeting
held on 9 September 2026**

7. Capital Programme - Monitor 1 2026/27

Resolved: That Executive:

- i) In relation to the overall programme:
 - **Recommended to Council** the adjustments resulting in a reduction in the 2026/27 budget of £5.008k as detailed in the report.
 - Noted the 2026/27 revised budget of £107.982m as set out in paragraph 9 and Table 2.
 - Noted the restated capital programme for 2026/27 – 2029/30 as set out in Annex 1.

Reason: To enable the effective management and monitoring of the Council's capital programme.

- ii) In relation to the investment at Burnholme:
 - Noted the award of grant from the Football Foundation of £700k for a new 3G pitch at Burnholme delegating the Director of Finance to sign the grant agreements with Football Foundation and GLL for their contributions
 - Agreed to adding the scheme to the capital programme with £150k CYC contribution from s106 / leisure sinking fund
 - Approved the Council to enter into the framework partner agreements, construction contract and other contract documents required to deliver the contract.
 - Accepted the risk that scheme cost overruns will need to be funded by the council.

Reason: To ensure that scheme funding can be accepted and the scheme delivery can progress in line with the Council's Constitution and Financial Regulations.

9. Recycling Review

Resolved: That Executive:

- i) **Recommended Council** to approve of the increase in general fund borrowing required to fund capital investment of up to £2.8m in recycling bins.

Reason: To ensure that the capital programme is fully funded and can be effectively monitored.

- ii) Approved moving from recycling boxes to 180l recycling bins as standard based on the financial business case supporting the project. The scope of properties in the first phase is up to 63,000. For those properties producing additional recycling materials, larger contain could be requested.

Reason: To improve efficiency of collections, increase recycling capacity, reduce operating costs, decrease musculoskeletal injuries and reduce street litter as well as providing an adequate kerbside collection service to meet simpler recycling reforms.

- iii) Delegated authority to officers to find solutions, in partnership with third parties, for some properties in the first, and future phases that may have storage challenges for wheeled bins. This could mean a small proportion of properties within the first scope of change remain on box collections.

Reason: To ensure residents have appropriate storage space within property boundaries and can benefit from outside space within their property boundary, allowing officers more time to find appropriate solutions for these properties to transition onto wheeled bins for recycling.

- iv) Approved Waste Services to consider requests for larger 240l containers following standard roll out to support increased recycling and waste minimisation. Special requests for 140l wheeled bins would be based on exceptional circumstances and the resident's ability to reasonably justify the request.

Reason: To ensure residents have appropriate capacity to increase recycling materials. To allow appropriate storage space within property

boundaries and can benefit from outside space within their property boundary.

Amendments to Motions on Notice

14.1 – Religious slaughter of animals

To be moved by Councillor Warters

Council notes that:

- The ritual slaughter of animals for the production of Halal and Kosher meat and meat products without prior full and unrecoverable stun is intolerably cruel, painful, unnecessary and should end.
- Recent undercover footage of activities at a Halal and Kosher slaughterhouse is utterly abhorrent and has no place in this country.

Council believes that:

- In a civilised country the unnecessary torture of animals should not be a matter of personal dietary choice nor be part of a religious exemption, (ADD) non-stun religious slaughter is wholly wrong.
- Indeed, Sweden, Denmark, Slovenia, Belgium, Norway, Switzerland, Iceland and Greece currently ban non stun animal slaughter.
- City of York Council should show compassionate and courageous leadership in dealing with this matter in much the same way as Lancashire County Council did some years ago.

Council resolves to;

- Instruct the Chief Executive to write to the Secretary of State for Environment, Food and Rural Affairs, Dame Angela Eagle MP and Parliamentary Under Secretary of State for Farming, Food and Fisheries stating the Council's concern over the production and sale of non and recoverable stun meat and meat products in the UK and to request removal of the religious exemption permitting

slaughter without full, unrecoverable stunning to be removed without delay.

- Ban the procurement of non and recoverable stunned ritually slaughtered meat and meat products by City of York Council.
- Ban the sale and consumption of non and recoverable stunned ritually slaughtered meat and meat products on directly operated City of York Council premises.
- Draft future City of York Council catering contracts and leases for food outlets on City of York Council premises to prohibit the sale and provision of such meat.
- Inform representative hospitality venues in the city of the view of City of York Council.
- Inform all food outlets in the city of the view of the City of York Council.
- Instruct the relevant City of York Council officers to ensure that any procurement of meat and meat products by City of York Council aims to ensure supply is sourced locally and with due regard to the highest possible welfare standards being able to be demonstrated.

14.2 – Tackling Fly-Tipping and Improving York’s Public Realm

To be moved by Councillor Kent

Council notes:

- That residents rightly expect their neighbourhoods to be clean, safe and well maintained, and that the quality of York’s public realm has a significant impact on residents’ quality of life, the attractiveness of our city and the local economy.
- York (ADD) is not immune to the increasing trend in fly tipping seen nationally, having recorded 2,954 reported fly-tipping incidents in 2024/25, an increase from 2,500 in 2023/24 and 2,368 in 2022/23. (ADD) Whilst all increases are concerning, York has consistently performed better than its regional neighbours.
- A further 2,807 incidents were recorded in the first nine months of 2025/26, demonstrating that fly-tipping remains a significant and persistent problem.
- The Council’s own performance data shows that reported vegetation issues, including weeds and overgrown hedges, increased from 1,993 in 2021/22 to 2,711 in 2023/24, (ADD) then fell to 2,468 in 2025-26, with reporting numbers fluctuating depending on levels of warm and wet weather, something made less predictable due to climate change.
- Only 50.8% of standard street-cleaning cases were resolved within the Council’s three-day target in the latest available performance data.
- (ADD) The current Labour administration has put pride in place at the heart of its actions by investing to bring weed spraying in-house, increasing frontline staffing levels across Public Realm, despite significant council budget pressures; introducing the Neighbourhood Caretakers team to tackle local issues and help frontline response times, and tackling the huge increase in demand due to the impact of climate change.
- Residents should not have to repeatedly report the same problems or accept that visible deterioration of their neighbourhood is simply the way things are.
- (ADD) Despite ongoing challenges, resident feedback through the Talkabout Panel shows those who think the council and partners

are doing well at improving the quality of streets/public spaces is higher now than when Labour took control of the council in 2023.

(ADD) Council recognises how much residents value and want to see York looking its best, and thanks those York residents who regularly undertake work to help keep their areas tidy by making them litter and weed free.

It further recognises and appreciates the good work undertaken day in, day out by dedicated Public Realm teams across York.

Council believes:

- That clean and well-maintained neighbourhoods should not be a luxury. Residents across York deserve a Council that is proactive in tackling fly-tipping and takes pride in the everyday appearance of the places where people live.
- That tackling these problems requires a proactive approach, rather than relying on residents to identify and report problems individually.
- That it is concerning that fly-tipping, litter, overflowing bins, graffiti, weeds and poorly maintained public spaces continue to be raised by residents across York.
- That the Liberal Democrat budget amendment (ADD) could (DELETE) ~~would~~ have provided an opportunity to invest in practical improvements to York's neighbourhoods, (ADD) but instead proposed no funded long term plan to tackle fly-tipping, voted against additional investment in Neighbourhood Caretakers and the positive difference the team is making all across York, and u-turned to support green waste collection charging by failing to budget for free collections.

~~(DELETE) and to demonstrate that council spending can deliver visible benefits for residents. Including £300,000 additional into frontline services, a reduction to the Green Bin Tax, and the introduction of Community Skips.~~

Council therefore resolves to:

- To recognise the increasing scale and persistence of fly-tipping and public-realm problems across York, (ADD) over multiple political administrations, partly linked to a changing climate but due to external factors too, and the impact these have on residents and neighbourhoods.
- To reaffirm that (DELETE) stopping (ADD) reversing the decline in the cleanliness, appearance and condition of York's neighbourhoods (DELETE) should be (ADD) is a priority for the Council, (ADD) as evidenced by the recruitment of a new Neighbourhood Caretaker team, including budgeting for additional staff this year to keep paths and active travel routes clear.
- To call on the Executive, (ADD) and all opposition parties, to bring forward proposals, as part of next year's budget, that would increase the resources available to tackle fly-tipping (ADD) and littering, including potentially through behaviour change campaigns, and improve the public realm across York's neighbourhoods.
- (ADD) To support the Mayor in the necessary consultation on a Visitor Levy before it can be enacted in York, and work on joint proposals as to how income can be used for the benefit of York given the additional budget pressures brought about by being a hugely popular visitor destination.

14.3 – Building a Care System That Works: York's role in the National Conversation on Care

To be moved by Councillor Steward

This Council notes:

- Adult social care is one of the biggest challenges of our time and the system is unsustainable – for patients, their families, communities and for the future existence of councils;
 - The Prime Minister has committed to fixing the broken social care system by working across party lines, setting out a new approach to politics based on problem-solving rather than point-scoring, and drawing a line under decades of governments leaving this issue unaddressed;
 - Baroness Louise Casey, who chairs the Independent Commission on Adult Social Care, has launched the Big Conversation on Care, giving the public the chance to help shape the future of adult social care in England, starting with what values and principles a care system should be built on;
 - In June 2026, a national average of 13,600 people a day were medically fit to leave hospital but unable to do so, partly due to the unavailability of social care, while around 3,000 instances of corridor care are occurring daily as a result of pressures on hospital capacity;
 - A&E attendances by people aged 65 and over has risen from 3.3m in 2011/12 to 5.8m in 2024/25, growth far outstripping the increase in the older population, and cuts to adult social care funding between 2010 and 2018 are estimated to have driven around half a million additional A&E attendances a year among people aged 65 and over;
 - In York, the situation reflects the national picture but with acute local pressures that are impossible to sustain:
- Demand: a 28% increase in those eligible for adult social care support in only two years – up 350 to 1616 residents;

- Frailty and dementia: the number of over 65s with dementia is forecast to increase by 10% between 2025 and 2029;
 - Complex needs: the number in long-term residential and nursing care has increased by 18% in just two years - up 104 to 671 residents;
 - Workforce vacancy rate: turnover and recruitment challenges remain some of the most significant risks to service stability.
-
- York Hospital is sometimes operating at extremely high capacity, with a small minority of its patients at times medically fit for discharge, but unable to leave;
 - York's Neighbourhood Teams and Voluntary Sector organisations are making a positive impact, but the scale of need currently exceeds the capacity of the system, particularly in relation to unpaid carers, people experiencing multiple disadvantage, and those requiring intensive support to remain independent – up 23% in three years, or 22 to 102 residents.
 - The Council continues to face huge financial pressures, with rising placement costs, increased demand for safeguarding and community support, and a fragile provider market that requires sustained national reform rather than short term fixes. York's safeguarding concerns numbers also rose substantially – up 27%, or 650 to 3,088 concerns in just two years.

This Council welcomes:

- The drive shown by the national Independent Commission on Adult Social Care in working to bring forward its reporting timetable, recognising the urgency felt by residents, carers, care workers, Unions and Local Government, who cannot afford to wait for lasting reform;
- The Prime Minister's willingness to engage opposition parties in this process, in the belief that a problem of this scale and longevity can only be solved through a settlement built to outlast any single Parliament.

This Council resolves (ADD) the very basic and obvious of:

- Promote the Big Conversation on Care to residents, staff, carers, providers, trade unions and local partners to maximise participation;
- Commit its full support and participation in the national conversation through local engagement events, sharing local data and case studies, or any other means it's considered will support the Commission's work;
- Continue to work constructively with all political groups represented on this Council, and with neighbouring authorities, health and care partners, user representatives and trade unions, mirroring national efforts to build a cross party consensus that will enable social care reform to endure;
- Ask the Executive Member for Adult Social Care to report back to Full Council on the outcomes of local engagement with the Big Conversation on Care, and on the Commission's findings as they are published.

(ADD) But also more tangibly to:

- **Guarantee Care Assessments Within 28 Days** - introduce a 28-day maximum target from first contact to assessment completion. Publish performance to the People Scrutiny Committee. The measures of success will be 90%+ of assessments completed within 28 days and a reduction in complaints about delays;
- **Deliver Minor Home Adaptations Within 10 Working Days** – ensure a dedicated 'rapid adaptations team' for the likes of rapid installing grab rails, ramps, or key safes which can currently taking weeks or months. Authorise occupational therapists to approve works (up to set reasonable cost thresholds) immediately. The measures of success will be 90% of minor adaptations completed within 10 working days and a reduction in falls and hospital admissions;
- **Introduce Annual Carer Health and Wellbeing Checks** – particularly mindful of the York Carers Strategy 2026 to 2032, to better look after carers and ensure they are checked on rather than only getting help at crisis point. The scheme will offer and encourage every registered unpaid carer to have an annual assessment which will include mental health screening and emergency

contingency planning. There will also be automatic offers of respite options. Measures of success will be increased carer retention, reduced breakdown of care arrangements and improvements in surveyed carer welfare;

- Create a '48-Hour Hospital Discharge Response Service' – a dedicated reablement team would be available seven days a week and would contact and deal with every discharged resident within 48 hours. They would ensure completion of urgent care package arrangements immediately. Measures of success are fewer delayed discharges and lower hospital readmission rates;
- Give every Adult Social Care Client Digital Access to their case - whilst still providing for people who are not online, make rapid progress to a comprehensive online portal showing: Assessment status, Care plan, Named social worker, Review dates, and Documents and correspondence. Measures of success are a reduction in avoidable enquiries and improved resident satisfaction scores.
