

Sub-Committee Update

8 September 2016

Agenda Item 4g

**16/01845/FUL Proposed Telecommunications Mast Hull Road,
Osboldwick**

Traffic and Highway Development – No objections

The cabinets, pole and railings will not impact on the line of sight for users of the highway be that drivers, pedestrians or cyclists. The set back is considered adequate. It is not necessary to seek an area for a maintenance vehicle to park given that such visits will be infrequent and it is expected that anyone visiting the cabinets would park up in a suitable location, as obliged under the Highway Code and walk to the site.

Neighbours

One letter of objection received objecting on the following grounds:

- Would attract school children
- Mobile masts can be harmful
- A more appropriate site could be found
