Policy SS10: Land North of Monks Cross  Item No. X  Page 49	x. Demonstrate that all transport issues have been addressed, in consultation with the Council and Highways England, as necessary, to ensure sustainable transport provision at the site is achievable. The site will exacerbate congestion in the area, particularly at peak times given its scale and the capacity of the existing road network. The impacts of the site individually and cumulatively with sites ST7, ST9, <u>and</u> ST14 <u>and</u> <del>ST35</del> should be addressed.	Reference to ST35 removed following removal of policy SS19/ Site Allocation ST35 from the plan.

<p>Policy EC1: Employment Allocations</p> <p>Explanatory text</p> <p>Page 77</p>	<p><u>The location of allocation E18 adjacent to Strensall Common SAC means that a comprehensive evidence base to understand the potential impacts on biodiversity from further development is required. Strensall Common is designated for it's heathland habitats but also has biodiversity value above its listed features in the SSSI/SAC designations that will need to be fully considered. Although the common is already under intense recreational pressure, there are birds of conservation concern amongst other species and habitats which could be harmed by the intensification of disturbance. In addition, the heathland habitat is vulnerable to changes in the hydrological regime and air quality, which needs to be explored in detail. The mitigation hierarchy should be used to identify the measures required to first avoid impacts, then to mitigate unavoidable impacts or compensate for any unavoidable residual impacts, and be implemented in the masterplanning approach. Potential access points into the planned development also need to consider impacts on Strensall Common.</u></p>	<p>New explanatory text to ensure that allocation E18 is considered in relation to Strensall Common SAC.</p>
