

Table 1: Analysis of Initial Health Assessment Timeliness Data

	Quarter 1 (2018)	Quarter 1 (2019)
Number of IHA requests received from the LA	16*	16
% completed within statutory timescales	6%	18%**
% delays due to receiving late requests from the LA (over 5 working days)	88%	82%
% due to delays in offering paediatric appointments	12%	18%
Where there is already a delay, the % where there was a secondary delay due to late offer of a Paediatric appointment	Data not routinely collected	50%

Where there were delays in offering a health appointment, the average number of days over 20 working days that a child is offered an appointment	Data not routinely collected	5 days
---	------------------------------	--------

*There are still 5 notifications outstanding

** 2019 IHA's successfully completed out of statutory timescale of 20 working days:

2 requests received in 5 days of becoming LAC and completed on time
12%

11 requests received between 10 days and 30 days after becoming LAC
69%

The longest wait in Q1 for family of 3 IHA's was 50 days after becoming LAC 19%

Table 2: Analysis of Review Health Assessment Timeliness Data

	Quarter 1 (2018)	Quarter 1 (2019)
Number of RHA requests received from the LA	31	41
Number declined	2%	16%
% completed within statutory timescales	13%	61%
% delays due to receiving late requests from the LA	70%	30%
% delays in health staff undertaking the assessment	10%	9% (7% other reasons- further analysis underway)
